FOREWORD

REC #1 HATONN

SUN., JAN. 21, 1996 7:57 A.M. YEAR 9, DAY 158

SUN., JAN. 21, 1996

Since life is what happens while you give everything you have to meeting obligations and responsibility and make other plans, we too are stuck in the bog of that which comes to impact our lives. Then, when the graduation testing comes along, one is always appalled at how well or how badly you experienced your lessons and how well or how badly you learned those lessons. We all, as professors, have passers and flunkers and occasionally an outstanding student or two who hold truth and also experience life in its myriads of complications and complexities.

Anyone, however, who experiences by gathering with deceivers and works diligently in unlawful and unethical manners has automatically “flunked”. The consequences of that failure to move toward the lighted paths of right-ness shall only bog you more deeply into the traps of the leaders of the wrongful in your attempt to destroy another. The destruction and ruination brought upon self is rarely given sympathy.

Yes indeed, we know of many who fit into this category this very day and we shall devote a full journal to the matter so that all can learn and see. This, however, is not the journal.

SPIRITUAL TRUTH HAS LITTLE TO DO WITH CHURCHES, BIBLES AND RELIGION

“Of all the tyrannies that affect mankind, tyranny in religion is the worst; every other species of tyranny is limited to the world we live in; but this attempts to stride beyond the grave, and seeks to pursue us into eternity.”

Thomas Paine, 1737—1809

Thomas Paine is THE man unto which I offer my bended knee for striving without rest to bring America into enlightenment and to offer you a true **REPUBLIC**. Since I haven’t space to adequately eulogize and honor this man, then perhaps since we have been writing on “Church Order” we might share his singular recognition as offered in his *AGE OF REASON*.

Let us please just share his own thoughts as put to print for it is LONG PAST time that you see it and think upon the wisdom offered.

[QUOTING:]

THE AGE OF REASON by Thomas Paine

It has been my intention, for several years past, to publish my thoughts upon Religion. I am well aware

of the difficulties that attend the subject; and from that consideration, had reserved it to a more advanced period of life. I intended it to be the last offering I should make to my fellow-citizens of all nations; and that at a time when the purity of the motive that induced me to it could not admit of a question, even by those who might disapprove the work.

The circumstance that has now taken place in France of the total abolition of the whole national order of priesthood, and of everything appertaining to compulsive systems of religion, and compulsive articles of faith, has not only precipitated my intention, but rendered a work of this kind exceedingly necessary; lest, in the general wreck of superstition, of false systems of government and false theology, we lose sight of morality, of humanity and of the theology that is true.

As several of my colleagues, and others of my fellow-citizens of France, have given me the example of making their voluntary and individual profession of faith, I also will make mine; and I do this with all that sincerity and frankness with which the mind of man communicates with itself.

I believe in one God, and no more; and I hope for happiness beyond this life.

I believe in the equality of man, and I believe that religious duties consist in doing justice, loving mercy, and endeavoring to make our fellow creatures happy.

But, lest it should be supposed that I believe many other things in addition to these, I shall, in the progress of this work, declare the things I do not believe, and my reasons for not believing them.

I do not believe in the creed professed by the Jewish Church, by the Roman Church, by the Greek Church, by the Turkish Church, by the Protestant Church, nor by any church that I know of. My own mind is my own church.

All national institutions of churches—whether Jewish, Christian or Turkish—appear to me no other than human inventions, set up to terrify and enslave mankind, and monopolize power and profit.

I do not mean to condemn those who believe otherwise. They have the same right to their belief as I have to mine. But it is necessary to the happiness of man that he be mentally faithful to himself. Infidelity does not consist in believing, or in disbelieving; it consists in professing to believe what he does not believe.

It is impossible to calculate the moral mischief, if I may so express it, that mental lying has produced in society. When a man has so far corrupted and prostituted the chastity of his mind as to subscribe his professional belief to things he does not believe, he has prepared himself for the commission of every other crime. He takes up the trade of a priest for the sake of gain, and in order to qualify himself for that trade, he begins with a perjury. Can we conceive any thing more destructive to morality than this?

Soon after I had published the pamphlet *Common Sense*, in America, I saw the exceeding probability that a revolution in the system of government would be followed by a revolution in the system of religion. The adulterous connection of church and state—has so effectually prohibited by pains and penalties every discussion upon established creeds, and upon first principles of religion, that until the system of government should be changed, those subjects could not be brought fairly and openly before the world, but that

whenever this should be done, a revolution in the system of religion would follow. Human inventions and priestcraft would be detected, and man would return to the pure, unmixed and unadulterated belief of one God, and no more.

Every national church or religion has established itself by pretending some special mission from God, communicated to certain individuals. The Jews have their Moses; the Christians their Jesus Christ, their apostles and saints; and the Turks their Mahomet—as if the way to God was not open to every man alike.

Each of those churches show certain books, which they call revelation, or the word of God. The Jews say that their word of God was given by God to Moses, face to face; the Christians say that their word of God came by divine inspiration; and the Turks say that their Word of God (the *Koran*) was brought by an angel from heaven. Each of those churches accuses the other of unbelief; and for my own part, I disbelieve **them all**.

As it is necessary to affix right ideas to words, I will, before I proceed further into the subject, offer some observations on the word revelation. Revelation, when applied to religion, means something communicated immediately from God to man.

No one will deny or dispute the power of the Almighty to make such a communication, if He pleases. But admitting, for the sake of a case, that something has been revealed to a certain person, and not revealed to any other person, it is revelation to that person only. When he tells it to a second person, a second to a third, a third to a fourth, and so on, it ceases to be a revelation to all those persons. *It is revelation to the first person only, and hearsay to every other, and consequently they are not obliged to believe it.*

It is a contradiction in terms and ideas, to call anything a revelation that comes to us at second-hand, either verbally or in writing. Revelation is necessarily limited to the first communication—after this it is only an account of something which that person says was a revelation made to him; and though he may find himself obliged to believe it, it cannot be incumbent on me to believe it in the same manner, for it was not a revelation made to me, and I have only his word for it that it was made to him.

When Moses told the children of Israel that he received the two tablets of the commandments from the hand of God, they were not obliged to believe him, because they had no other authority for it than his telling them so; and I have no other authority for it than some historian telling me so. The commandments carry no internal precepts, such as any man qualified to be a lawgiver, or a legislator, could produce himself, without having recourse to supernatural intervention.

When I am told that the *Koran* was written in heaven and brought to Mahomet by an angel, this comes too near the same kind of hearsay evidence and second-hand authority as the former. I did not see the angel myself and, therefore, I have a right not to believe it.

When also I am told that a woman called the Virgin Mary, said, or gave out, that she was with child without any cohabitation with a man, and that her betrothed husband, Joseph, said that an angel told him so, I have a right to believe them or not; such a circumstance required a much stronger evidence than their bare word for it; but we have not even this—for neither Joseph nor Mary wrote any such matter them-

selves; it is only reported by others that they said so. It is hearsay upon hearsay, and I do not choose to rest my belief upon such evidence.

It is curious to observe how the theory of what is called the Christian Church sprung out of the tail of the heathen mythology. A direct incorporation took place in the first instance, by making the reputed founder to be celestially begotten. The trinity of gods that then followed was no other than a reduction of the former plurality, which was about twenty or thirty thousand—the statue of Mary succeeded the statue of Diana of Ephesus. The deification of heroes changed into the canonization of saints. The mythologists had gods for everything; the Christian mythologists had saints for everything, the Church became as crowded with the one as the Pantheon had been with the other, and Rome was the place of both. The Christian theory is little else than the idolatry of the ancient mythologists, accommodated to the purposes of power and revenue; and it yet remains to reason and philosophy to abolish the amphibious fraud.

Nothing that is here said can apply, even with the most distant disrespect, to the real character of Jesus Christ. He was a virtuous and an amiable man. The morality that he preached and practised was of the most benevolent kind; and though similar systems of morality had been preached by Confucius, and by some of the Greek philosophers, many years before; by the Quakers since; and by many good men in all ages, it has not been exceeded by any.

Jesus Christ wrote no account of himself, of his birth, parentage, or anything else. Not a line of what is called the *New Testament* is of his writing. The history of him is altogether the work of other people; and as to the account given of his resurrection and ascension, it was the necessary counterpart to the story of his birth. His historians, having brought him into the world in a supernatural manner, were obliged to take him out again in the same manner, or the first part of the story must have fallen to the ground.

The resurrection and ascension, supposing them to have taken place, admitted of public and ocular demonstration, like that of the ascension of a balloon, or the sun at noon-day, to all Jerusalem at least. A thing which everybody is required to believe, requires that the proof and evidence of it should be equal to all, and universal; and as the public visibility of this last related act was the only evidence that could give sanction to the former part, the whole of it falls to the ground, because that evidence never was given. Instead of this, a small number of persons, not more than eight or nine, are introduced as proxies for the whole world to say they saw it, and all the rest of the world are called upon to believe it. But it appears that Thomas did not believe the resurrection, and, as they say, would not believe without having ocular and manual demonstration himself. *So neither will I*, and the reason is equally as good for me, and for every other person, as for Thomas.

The best surviving evidence we now have respecting this affair is the Jews. They are regularly descended from the people who lived in the times this resurrection and ascension is said to have happened, and they say, it is not true. It has long appeared to me a strange inconsistency to cite the Jews as a proof of the truth of the story. It is just the same as if a man were to say, I will prove the truth of what I have told you by producing the people who say it is false.

That such a person as Jesus Christ existed, and that he was crucified—which was the mode of execution at that day—are historical relations strictly within the limits of probability. He preached most excellent morality, and the equality of man; but he preached also against the corruptions and avarice of the Jewish

priests, and this brought upon him the hatred and vengeance of the whole order of priesthood. The accusation which those priests brought against him was that of sedition and conspiracy against the Roman government, to which the Jews were then subject and tributary; and it is not improbable that the Roman government might have some secret apprehensions of the effects of his doctrine, as well as the Jewish priests. Between the two, this virtuous reformer and revolutionist lost his life.

But if objects for gratitude and admiration are our desire, do they not present themselves every hour to our eyes? Do we not see a fair creation prepared to receive us the instant we are born—a world furnished to our hands, that cost us nothing? Is it we that light up the sun, that pour down the rain, and fill the earth with abundance? Whether we sleep or wake, the vast machinery of the universe still goes on.

I know that this bold investigation will alarm many, but it would be paying too great a compliment to their credulity to forbear it upon that account; the times and the subject demand it to be done. The suspicion that the theory of what is called the Christian Church is fabulous is becoming very extensive in all countries; and it will be a consolation to men staggering under that suspicion, and doubting what to believe and what to disbelieve, to see the object freely investigated.

When the Church mythologists established their system, they collected all the writings they could find and managed them as they pleased. It is a matter altogether of uncertainty to us whether such of the writings as now appear under the name of the *Old* and *New Testaments* are in the same state in which those collectors say they found them, or whether they added, altered, abridged or dressed them up.

Be this as it may, they decided by vote which of the books out of the collection they have made should be the *Word of God*, and which should not. They rejected several; they voted others to be doubtful such as the books called the Apocrypha; and those books which had a majority of votes were voted to be the Word of God. Had they voted otherwise, all the people, since calling themselves Christians, had believed otherwise—for the belief of the one comes from the vote of the other. Who the people were that did all this, we know nothing of; they called themselves by the general name of the Church, and this is all we know of the matter.

When Samson ran off with the gate-posts of Gaza, if he ever did so (and whether he did or not is nothing to us), or when he visited his Delilah, or caught his foxes, or did anything else, what has revelation to do with these things? If they were facts, he could tell them himself, or his secretary, if he kept one, could write them, if they were worth either telling or writing; and if they were fictions, revelation could not make them true; and whether true or not, we are neither the better nor the wiser for knowing them. ***When we contemplate the immensity of that Being who directs and governs the incomprehensible WHOLE, of which the utmost ken of human sight can discover but a part, we ought to feel shame at calling such paltry stories the Word of God.***

Thomas Paine, political writer, statesman and author of Common Sense, the Declaration of Independence, Rights of Man and The Age of Reason.

To My
FELLOW-CITIZENS
of the
UNITED STATES OF AMERICA:

I put the following (above) work under your protection. It contains my opinions upon Religion. You will do me the justice to remember that I have always strenuously supported the Right of every Man to his own opinion, however different that opinion might be to mine. He who denies to another this right, makes a slave of himself to his present opinion, because he precludes himself the right of changing it.

The most formidable weapon against errors of every kind is Reason. I have never used any other, and I trust I never shall.

Your affectionate friend and fellow-citizen.

Thomas Paine

*Luxembourg, 8th Pluviose,
Second Year of the French Republic, one and indivisible.
January 27, O.S. 1794.*

[END OF QUOTING]

I had wanted to allow this writing of today to have fallen on the 27th day of January so that you can see that some anniversaries have merit, however, it would, seemingly, interfere with the orderly flow of journals and we must not, it appears, allow the orderly flow of journals to disrupt the computerization of page numbers and labels. What I have done, however, will save Dharma a writing for I will insist that it be presented AGAIN on that date a week from now. This is, however, the only edition of what was once called the *Liberator* and now *CONTACT* to carry this “REASON” timely.

As we struggle here to protect our own people from the brand of cult and other grouping names we are continually bashed about by those who actually come our way and claim to be “one of us”, whatever that could mean, for if you are anything at all you would realize right off that we claim nothing save truth in presentation.

There is only ONE GOD-CREATOR and yet there are unlimited CREATIONS and it has come to be that you now are dying in a time of chaos and irrational thoughts and actions.

You have most definitely reached the *THE AGE OF CHAOTIC NON-REASON AND FOOLISHNESS* as might be offered by Thomasin Painfulness. So be it and when the 2"x4" of *reason* strikes thee across the brow, may it not be too late for your journey's perfection.

Gyeorgos Ceres Hatonn
January 21, 1996
Year 9, Day 158

CHAPTER 1

REC #2 HATONN

RI., DEC. 29, 1995 3:27 P.M. YEAR 9, DAY 135

FRI., DEC. 29, 1995

JUST WHEN YOU THOUGHT....

I know that just when you thought I was off on one tangent, here I go back onto another “old” one. Why? Because I have some “scientists” who are moving in the wrong direction and I don’t want to just snatch them back nor do I wish to relate the “how to” because I make a lot of effort to protect my secretary. I can share most openly by simply reminding you that you have information in great supply and, if you take what is offered and LISTEN to instructions, you will have no problem working out the most dreary or magnificent things.

I note that you are tinkering with and pondering about some of Tesla’s circuits and pondering how to capture frequencies of potentially unlimited structure and move them into controlled and useful tools.

Since we have written so much on the man, Tesla, I think I shall just start in the middle of what may seem, to most, as being unnoteworthy, but it IS. We know all about his alternating currents, etc., so let us just move on and talk about “Tuned Circuits”.

I would like to again thank Bob James for offering information in the form of a book by Philip S. Callahan called *Tuning In To Nature*.

As I found when dealing with subjects such as cells, we were as babes in the woods so I gave you a sort-of “glossary” so that you could become a bit informed as we offered input to our already educated engineers and scientific personnel. I am going to bypass that very important detail here because of Dharma’s time constraints and I need this information put to writing. If we can find time to offer definitions we will try to do so later.

ABOUT TUNED CIRCUITS MORE ON NIKOLA TESLA

EXCERPTS FROM *TUNING INTO NATURE*, By Philip S. Callahan, 1975, The Devin-Adair Company, Connecticut.

[QUOTING:]

[H: You who are “hung-up” on some aspects of your work will find some key issues covered here in what will seem to be substantially more simplicity than you have grown to complicate the systems.]

Why is the invention of the tuned circuit by this fascinating man, Nikola Tesla, so important? Let us take a quick look at what a tuned circuit **really is**. Resonant waves have been known ever since man invented the first stringed musical instrument. Most people seem to understand how sound resonance works, but many apparently draw a complete blank when the subject of electrical resonance is approached. From this standpoint, electrical resonance seems to have suffered the same fate as Tesla himself—obscurity!

A wave, as you know, is made up of a series of crests and troughs; this holds true for liquid waves, sound waves, and electromagnetic waves—regardless of how long or short they are. If, by some means, mechanical or otherwise, waves are put in “phase”, then the crest of one meets the crest of the other, and waves march in unison and thus add together. If they are 180 degrees out of phase—so that waves and troughs are opposite each other—then they cancel out, and the result is no wave or 0. In the region of light (electromagnetic radiation) this is called constructive (addition) or destructive (cancellation) interference. Waves in phase are said to resonate, or to be coherent. The electromagnetic wave is called a *sine* wave in electronic terminology. One wavelength is equal to the length of one whole crest and one whole dip.

A traveling train of waves has a frequency that equals the number of its crests that pass a given point per second. Thus, for my 300-kilocycle station (1 kilocycle = 1,000 cycles) in Ireland, 300,000 cycles, or sine waves, passed over a point on the surface of the earth each second. Obviously, if wavelength = the speed of light divided by the frequency, then the velocity (speed) of the wave equals wavelength times frequency; or in the case of my radio range station in Ireland, mentioned in the last chapter, velocity = 300 kilocycles x 1,000 meters = 300,000 kilometers per second, or the speed of light. Now we see why it is so important to have accurate measurements of the speed of light. In 1907, Albert Michelson was the first American to receive a Nobel Prize in Science. He received it for measuring very accurately the speed of light with his Michelson interferometer. Today, scientists utilizing a hydrogen-cyanide laser are calculating a light-speed constant that is 100-fold more accurate than previous values. They are looking at a reproducibility of one part in 10,000 billion (1 in 10^{13}).

In the spectral region of the long waves of my radio range station, or of Tesla’s earth waves, great accuracy is not necessary; but, at the present time, we are working at the other end of the spectrum where light and IR [Infra Red] wavelengths are micrometers or less long. If we are going to look at “tuned” or resonant circuits in these regions, we need to know the speed of light to a much greater degree of accuracy.

If you look at a regular light bulb, the electrons that make up the rays reaching your eyes are not marching together in phase. They are all going out in different directions, and at different times. The emitted electrons do not oscillate together in harmony. Waves that do not march together are called incoherent waves, as shown in the top of Figure 5 (next page). Waves that do march together are called coherent waves (bottom of Figure 5).

fig 5

[E.Y. editor’s note: For you more technically aware readers, I have to jump in here and correct the sentiment of the above paragraph because electrons are not going anywhere. Agitated electrons in the filament of the bulb give off photons of light and these photons interact with the eye

and are perceived as light.]

In basic terms, we know what waves and frequency are, but how does one get waves to march together like soldiers? How does one put them in phase so that they resonate? This problem was solved by Tesla for long waves in 1897 with his “tuned circuit”. C.H. Townes solved it for very short light waves in 1953 with his gas laser.

There are some admirers of Tesla, and I am one, who suspect that he invented the laser years ago and destroyed it for fear it would become a tool of war. **[H: No, he didn't destroy it but did share it with “others” who have used it and become the world leaders in such technology and NO, IT IS NOT THE U.S.A.!] Modern researchers may protest that Tesla never patented a laser. They might maintain that he could not have done so because Einstein hadn't invented quantum mechanics at that period of science. [H: Pooh, Einstein was a distractor with inaccurate information and information taken from Tesla's property which contained some of the information of which we speak here, but the reason there is no patent is that Tesla finally realized that what was patented was STOLEN IMMEDIATELY and knew the patent office and department were only conduits to take and use his work. This is something that if ALL OF YOU REALIZED, you would quit giving your enemy your technology.]** The argument isn't valid, however, for Thomson discovered the electron before the theory of quantum mechanics was developed. Thomson looked on electrons as raisins buried in a big cake—the atom! He did not have the concept of little packets of energy orbiting around a nucleus, as we view electrons today. There are many who believe however, that Tesla did invent what he termed a “death ray”. **[H: Well, what is a “laser”?] Half of any great discovery is hypothesis based on asking the right question. He was known to have had a good grasp of gas discharge phenomena and told of a death ray he invented that could cut through solids! Let me quote from a lecture, “On Light and Other High Frequency Phenomena”, delivered at Franklin Institute, Philadelphia (February 1893). [H: I felt the full presentation was so valid as to have offered this to you readers some years ago. If it can be located and extracted from our writings, please run it when space is available.]**

It is very likely that resonant vibration plays a most important part in all manifestations of energy in nature. Throughout space, all matter is vibrating, and all rates of vibration are represented from the lowest musical note to the highest pitch of the chemical rays; *hence an atom, or complex of atoms, no matter what its period, must find a vibration with which it is in resonance.* When we consider the enormous rapidity of the light vibrations, we realize the impossibility of *producing such vibrations directly with any apparatus of measurable dimensions,* and we are driven to the only possible means of attaining the object of setting up waves of light by electrical means and economically, that is, to affect the molecules or atoms of a gas to *cause them to collide and vibrate.* We then must ask ourselves: how can free molecules or atoms be affected? [Italics added.]

[H: Now we are approaching the very subjects which were the focus of our work on Light and with Walter Russell's input. I would, therefore, since we now have ample input from totally separate resources as to diagrams that we will get around to offering Tom Astley's “receivings” which are far more accurate in presentation and unclouded by people who have usurped his work as has been Walter Russell's. I would acknowledge that ones from claimed Russell resources are working on energy devices, etc., which are direct take-off of Tesla's work. And the minute

they override Tesla's patents—they can expect legal repercussions. If they hold Russell's work hostage—then too shall we-the-people HOLD THEM LIABLE FOR ANY UTILIZATION OF TESLA'S WORK! It shall be called Patent and Copyright violations. Those people in point can giggle and waggle and discount MY PRESENCE AND POSITION AND POSSIBILITIES—IT MATTERS NOT A WHIT. I AM EXACTLY WHO I SAY I AM AND SO ARE THE AUTHORS OF THE *PLEIADES CONNECTION* SERIES OF JOURNALS.]

The quotation is irrefutable proof that in 1893 Tesla asked the right question about resonating short light waves. He knew that molecular “in-phase” waves could not be attained with “apparatus of measurable dimensions”; that is, with coils and condensers as used in the radio region of the spectrum. One would have to put the atoms in resonance to obtain what today we call coherence.

The helium-neon laser, which puts out a coherent in-phase red beam, works on the principle of what laser physicists call “collisions of the second kind” between two dissimilar gases. At any finite pressure, the lifetime of any radiation emission will be significantly lengthened by light emitted from atoms being absorbed and re-emitted by other atoms. This is a sort of chain reaction system where re-emittance and reabsorption occur in cycles until, after a number of such cycles, the light escapes as radiation. The stimulus for the radiation from the gas is an electrical discharge, just as Tesla suggested.

It is absolutely inconceivable that a man who knew what Tesla did about gas discharges, light rays, and resonating systems, would not attempt to resonate the output of his gas tubes by some method such as is used in present-day laser research. One would have to be of an extremely selfish nature not to admit the possibility that his “death ray” was a laser. **[H: Well, readers, there are A LOT of such selfish people running around claiming to want to “help society”. No, I don't buy it either, for when you want to help—you don't sue the truth-bringers.]**

Tesla never published in scientific journals, and since he considered himself a practical inventor working for humanity, most of his writings are in the form of verbose Victorian essays that were presented before scientific societies. A careful reading of these essays will prove conclusively that he did work on the concept of a laser. John O'Neill, in his biography, says, “Tesla never gave the slightest hint concerning the principles under which the device [death ray] operated.” O'Neill, however, was not a scientist, and besides, C.H. Townes had not invented the laser when O'Neill wrote his biography of Tesla in 1944.

One cannot read Tesla's lengthy essays in a critical manner and not admit that, as early as 1893, he had the concept of the laser. Just as resonant circuits of coils and condensers put oscillations of long radio waves in phase and produce coherence, so also do resonating molecules produce coherent light waves. We will never know if, in his later years, Tesla produced a real laser (death ray). He claimed that he did. Whether or not we prefer to believe that Tesla designed a laser, in no way detracts from the genius of Townes, who accomplished the same objective in 1953. **[H: Of course it was from Tesla's working instructions. Great scientists work with others at every opportunity when there is respect and purpose while living in proximity of time—or through that which is quietly handed down from the elder to the seeking student.]** There are some who believe that the greatness of one scientist detracts from that of another. This is foolish thinking. Because we show that Tesla was an electrical genius, does not make Townes, or Edison, any less so.

It is interesting that Tesla was experimenting with resonating light waves in gas tubes in 1893, but more to the point that he did patent the first resonant “tuned” circuit in the radio portion of the spectrum.

In 1900, Tesla predicted radio as we know it today. In an essay entitled, “The Problems of Increasing Human Energy”, he wrote the following:

That communication without wires to any point of the globe is practical with such apparatus would need no demonstration, *but through a discovery which I made I obtained absolute certitude*. Popularly explained it is exactly this: When we raise the voice and hear an echo in reply, we know that the sound of the voice must have reached a distant wall, or boundary, and must have been reflected from the same. Exactly as the sound, so an electrical wave is reflected, and the same evidence which is afforded by an echo is offered by an electrical phenomenon known as a “stationary” wave—that is, a wave with fixed nodal and ventral regions. Instead of sending sound vibrations toward a distant wall, I have sent electrical vibrations toward the remote boundaries of the earth, and instead of the wall the earth has replied. In place of an echo I have obtained a stationary electrical wave, a wave reflected from afar. [Italics added.]

Tesla was not talking about the “make-and-break” telegraphy of Marconi, but rather about the principle of coherent waves in resonance or, as we say today, *standing waves* on an antenna. As he states, it was a discovery that he made, and it was the single most important concept of what today we call the science of electronics or radio. Of course Hertz, before 1891, knew about standing waves as is evident in his treatise, “Annalen der Physik and Chemi”. His resonator transmitter, however, was a small coil, loop antenna, and spark gap. Hertz never believed his system would be useful for long-distance communication! As shown in Figure 6, antennas are cut in lengths to match the same wave-length of oscillations being generated or received.

fig6

A resonant, or tuned, circuit may be a *series* or a *parallel* circuit, and is used to electrically shorten or lengthen the antenna. Parallel-tuned circuits (a condenser across a coil instead of at the end of the coil) are used in radio to couple resonant energy from one circuit to another in the transmitter or receiver. For the sake of keeping things simple, however, we will discuss a series-tuned circuit. Series-tuned circuits are often used to electrically “stretch” or “shorten” an antenna or waveguide (transmission lines) so that the length of the antenna or waveguide will match the length of the incoming wave. One would not want to cut or lengthen the antenna every time a different frequency station was tuned to. To accomplish the electrical shortening or lengthening, one places a coil and adjustable condenser in series with the antenna. The antenna then becomes a series-tuned circuit. It might be necessary with a receiver, for instance, to “tune” the antenna electrically to fit waves from 4-inches to 33-feet-long, as shown in Figure 6, or even, as in the case of my radio range, from point-to-point frequencies a few feet long to radio range signals half a mile long. Most antennas are cut to half or quarter wavelengths, for the simple reason that it takes less wire and still works for resonance.

If we look at Tesla’s 1897 patent (No. 649,621) we see what looks like nothing more than a couple of coils across an electric generator. Actually, his **drawings represent a transmitter**. For an oscillator

(wave producer), Tesla used the AC generator that he invented. This, of course, sends out alternating current in the form of a sine wave. His transmitter consists of a generator across a huge double-loop primary coil. The secondary coil is made of many turns and is grounded at one end. The other end extends upward as a loop antenna. The receiver on the right was a light bulb.

diagram by tesla

The drawing actually filed in the patent does not convey the enormity of this transmitter. Reading the patent does, however, because the loop antenna is of tremendous size, and according to the patent is to be wrapped around a large balloon in the sky. In section 85 of his patent, Tesla tells us that his secondary coil is wound with 50 miles of wire. This includes the loop antenna around the balloon. Since the speed of light is equal to 300,000 kilometers per second, or approximately 186,000 miles per second (we do not have to be very accurate with such long waves), and since Tesla tells us his waves were 200 miles long, then we see his motor was putting out an AC sine wave at:

$$\frac{186,000}{200} = 930 \text{ cycles per second}$$

or a frequency of 930 (200 mile-long) waves per second. This means, in essence, that Tesla was maintaining 930 stationary waves, or sine waves, in his secondary coil. Since his waves are 200 miles long, and his coil only 50, he has in effect a “tuned” quarter-wave transmitting antenna.

At this point, Tesla still is not able to vary wavelengths with his tuned transmitter. Although it is a resonant system, it is fixed to wavelengths 200 miles long, because his 50-mile-long coil and antenna wire are cut to that fixed one-quarter length. His next patent, No. 685,953 (filed June 24, 1899), is entitled, “Method of Intensifying and Utilizing Effects Transmitted Through Natural Media”. **[H: Please never allow the idea “transistor” to leave your minds.]** By natural media, Tesla meant air. This second patent is essentially a variable plate condenser utilized to tune the coil and antenna of his transmitter. When Tesla placed this condenser circuit in series with his coil in the transmitter, he had produced a variable tuned circuit, and could resonate quite accurately to many wavelengths by varying the condenser in the circuit.

In electronics, the term *reactance* means opposition to flow of current (the symbol is X). *Capacitive reactance* (X_c) is opposition to current flow offered by capacitors and *inductive reactance* (X_l) by coils. In a tuned circuit, the inductive and capacitive reactance are oppositely affected by frequency. In any series combination of capacitors and coils, there is one particular frequency where capacitive reactance equals inductive reactance ($X_c = X_l$). The two factors cancel each other out and, at that frequency, for those values the only resistance to the flow of current is that of the wire itself (Figure 7).

fig7

[H: I would pay careful heed to this information for remember what happened in Lawrence

Livermore labs in about 1989 or so was that the accelerators and circuits started a build-up chain reaction and almost blew out the western coastline of, at the least, California. We had to intervene and even then the chain reaction blew out every capacitor as if they weren't there. It is the out-of-control aspects which are so dangerous to your entire society—with this information.]

We see, then, that by making an adjustable coil or condenser, one can change the values of $X_c = X_l$ to fit any frequency and can thus tune the antenna to different wavelengths. This is the basic circuit for antennas, and for coupling from circuit to circuit in a transmitter or a receiver. All that tubes or transistors do is control the current from these tuned coupling circuits. **[H: IF YOU'RE LUCKY!]**

As we shall see later, antennas that resonate to short wave-lengths, below radio in the infrared and visible regions of the spectrum, may be constructed from insulative substances such as Plexiglass, instead of metal. Such a substance is called a *dielectric* material. They are cut to exact wavelengths, as our figure shows.

Hertz produced the first long radio waves, and Marconi sent them across distances with his antenna, but it was Tesla who made the whole system work by demonstrating the method by which any wave could be controlled at various frequencies. Of course, Tesla was attempting to transmit AC power across space, not to transmit radio signals. He succeeded, for he turned on light bulbs twenty-five miles away! The principles are the same for short or long waves in either case. Tesla should share with Hertz and Marconi the credit for modern electronics—this apart from the fact that he is the real father of our AC power system. It would not seem to me to diminish the genius of Hertz or Marconi to give Tesla his due credit. In my opinion, Tesla's tuned circuit was the most elegant of the three basic concepts of electronics.

What does the invention of the tuned circuit have to do with insect antennae? At first, the connection may seem quite remote, but now that we know what a tuned circuit is, let us take a closer look at how a laser works. Just as Tesla's tuned circuit puts out gigantic 200-mile-long waves in phase from an AC generator, so a laser puts out tiny short waves in the visible and *infrared region* from molecular oscillators. Insects are small, so any waves they might detect would have to be very short waves.

The word "laser" comes from the first initials of the words *LIGHT AMPLIFICATION BY STIMULATED EMISSION OF RADIATION*. **[H: How many of you knew that?]** Since lasers work by stimulating molecules to oscillate, and can be made to put out both visible or IR radiation, I prefer for my infrared work the term "maser", which means *Micrometer (IR) Amplification by Stimulated Emission of Radiation*. That is why I use that term in this book: insects utilize micrometer radiation.

As I pointed out before, an electrical discharge is utilized to stimulate emission from a gas laser. Of course, the stimulated emission is nothing more than a form of fluorescence, and the light radiation from the glowing tube is not in phase, and thus not coherent. To attain coherent light from the end of a long glass tube filled with gas, two reflecting mirrors have to be spaced exactly right so that the waves of light, or infrared, will bounce back and forth between them and finally all "get together" in resonance before shooting out the end as a coherent "in-phase" beam. We can later look at fluorescence, but for now, suffice it to say that it takes a lot of experimentation to figure out what mixture of gases to use to produce the fluorescence. It also takes rather complex mathematics to arrive at the correct spacing of the reflecting mirrors. Designing lasers is both an art and a science.

The distance between the mirrors is like the distance along the length of the wire antenna: it **must be made to match the wave-length that you expect to transmit**. There is one main difference, however. *Whereas radio antennas are usually half or quarter wavelengths long, laser mirrors may be separated by many wave-lengths of distance*. Since there is a long space filled with gas between the mirrors, a laser resonating system is called an open resonator or waveguide. We may still consider it a tuned circuit, however, since all the waves are put in phase by “tuning” or spacing the mirrors correctly for the desired frequency, just as the metal antenna is “tuned” by setting the coil and condenser for the correct reactance ($X_c = X_l$) values to electrically match the wavelength of the radio frequency.

The red coherent beam of a “tuned” helium-neon laser is so intense that it would severely injure your eye if you looked directly at it. You could, of course, see the beam as it gradually burned out your sensitive retina. Since coherent radiation is in phase, it is highly amplified. **[H: Still think there aren’t such things as blinding lasers?]** It may be likened to flipping three jump ropes at another person holding the ropes at the other end. If you flip them one at a time so that a wave moves along each rope, the crests and dips will all arrive at the person at different times, and so the force (mass) of the three ropes will be distributed over a certain time interval at the opposite end. If, however, you flip all three together at one time, the force (mass) of the undulating wave will arrive at the other person’s hand simultaneously, and the person holding the end will feel three times the force. That is exactly what tuned radio antennas and lasers do: they “flip” the generated oscillations, from gases in the case of the laser, or from the radio transmitter so that they all leave the transmitter at the exact same time, and arrive at the receiver at the same time.

In case of the radio transmitter, the detector of the coherent radiation is your radio receiver or TV set; in the case of the helium-neon laser it is a photocell, or your eye—if one is so foolish! Of course, if you get too close to a high-powered radar or TV antenna, it could damage the tissue of your body as severely as the laser would your eye. The simple fact that your body would not detect the damage done from high-energy radio as quickly, since you have no built-in receiver for the long radio or radar frequencies, but do for the short light frequencies. **[H: Speak for yourself, sir, for I know quite a few who have this built-in receiving system! Makes this communication problem quite simply explained, does it not?]**

The question we must ask ourselves is: Since man over the last few decades has learned to produce tuned circuits that put out coherent radio, infrared, and visible light, and to detect the frequencies with receivers which also incorporate tuned antennas to resonate to the wavelengths, can such a system already exist in nature? If so, how does such a natural system work, and in which part of the spectrum? I am now certain that such a natural system *does* exist, and that those most-successful-of-all living organisms, the insects, have evolved the organ for detecting these mysterious frequencies! **[H: Indeed, right down to the microbes!]** The paradox of this statement is that I should have spent twenty or so years proving that the insect antenna *really is an antenna*.

[END OF QUOTING]

I think if you are still wondering about a “conspiracy” as to your not being allowed freedom and knowledge—you must have your antennae on backwards. This is such old technology as to make me faint with concern over your state of affairs. You are people of the hidden agendas and LIES.

Thank you for these extra hours of work but it is time we get focused and stop dallying about. I refuse to

allow you to develop anything that you think you need to take PUBLIC. It is the current downfall of FREE MEN AND WOMEN IN A TOTALLY CONTROLLED WORLD. Let us use caution and consideration of all things, please. Salu and good evening.

CHAPTER 2

REC #1 HATONN

SAT., DEC. 30, 1995 9:15 A.M. YEAR 9, DAY 136

SAT., DEC. 30, 1995

WHAT, EXACTLY, IS ZIONISM?

We move along in the assumption that people are reading “every”thing we offer and we get careless about returning often enough to simple premises that a secret cannot be kept forever and, therefore, people will come to see the LIE. This is a wrong assumption.

I would like to consider two items at once to both save time and allow you to be getting your research materials together. Out of the recent days has come a most interesting book by a man called ben Weintraub (the small letter b is correct but if you can’t stand it, grammatically, capitalize it). The title: *KEYSTONE OF THE NEW WORLD ORDER; THE HOLOCAUST DOGMA OF JUDAISM*.

Since the writings compiled in this volume are so representative of that which we cover in *New World Church Order*; I will attempt to offer parts interspersed with information of our ongoing outlay of Church and Prophecy—not to even go into the fact that both are simply POLITICAL LIES.

A copy of the book was sent “for review” with petition for response. I am astounded that ones out of the dogma itself DARE to offer such comprehensive truth and yet do so with the unbiased attitude of a dictionary (a valid dictionary, that is). So, in answering the question, “What is Zionism?” we will simply offer page 150 and 151 from the above named book. I CERTAINLY WILL THEN GIVE YOU INFORMATION FOR GETTING THE BOOK ITSELF FOR IT IS LIKE OPENING A WINDOW FOR BOTH FRESH AIR AND *LIGHT*.

* * *

*“The Holocaust Dogma of Judaism:
Keystone of the New World Order”*

Cosmos Publishing Company
P.O. Box 15248
Washington D.C. 20003

* * *

From: *Keystone of the New World Order; The Holocaust Dogma of Judaism* by ben Weintraub. **Indeed, “one of THEM!” So, a better question might be “Who is THEM?” So be it, one topic at a time, if we can with any reasonable meaning.**

[QUOTING:]

WHAT IS ZIONISM?

“Zionism is Treason.

**It is a program for the political conquest
of the world, including the United States.
The United Nations is its instrument.**

**It is the super government mentioned in
The Protocols of the Learned Elders of Zion
promulgated at Zionist congresses between
1897 and 1905.”**

[H: So, it certainly can't be something that was “always there”, as in race or religion, tribe or species. The above quotation is from Henry H. Klein, Attorney, reporter, candidate for mayor of New York City, 1933.] For a full copy of Klein's “*Zionism Rules the World*”, order the June 1978 issue of *The Liberty Bell*, P.O. Box 21, Reedy, WV 25270.

Zionism's goal is not completed by creating the Marxist state of Israel but merely used Jerusalem as a strategic center at the crossroads of the East and West and as a world center of religious origins. The Knesset in 1981 passed a law permitting any Jew dying anywhere to claim Israeli citizenship, renounce his United States citizenship, and escape death and estate taxes without Israel taxing them. **[H: How is this for shrewd and clever treason?]** The IRS has a rule against this (Section 2017), but it has never been used. (National Vanguard, P.O. Box 2264, Arlington, VA 22202, Jan./Feb., 1986.) Israel also provides an enclave, or safe haven, for Jews who have dual-citizenship there and in any other nation in which they were born, to flee to in case they run afoul of the law “at home”. The truth is that the Jew is “at home” everywhere, with his worldwide synagogues and Masonic Lodges dispersed like lymph nodes in world politics, ever ready to bring the united aid of world Jewry to any trouble spot in the world. They are the New Imperium, as Rome once was, with its legions and courts stationed in the remotest parts of that known world, with this difference: Rome used mostly Romans in its legions until its race declined, whereas the Jews, through the United Nations, intend to have a continuous supply of helots or mercenaries to deploy for their money-interests throughout the world. Other tribes will supply the men, money, and supplies to keep their New Jewish Luciferian Empire functioning. Albert Pike and Jacob Javits' aid, Rosenthal, said that Lucifer was the **true God** and that Jesus was the counterfeit. **[H: Well, since the person by name was called Emmanuel, it is quite reasonable that the use of the name “Jesus” is an error. This no wise infers that “A” “Christ” is an error. THEY know “Jesus” as used is incorrect—because THEY set it up that way!]** The French Lodge of the Grand Orient is aptly named, for that is exactly what looms before the West—The Grand Orient.

Having continuously assassinated America's true leaders, from Louis T. McFadden, Secretary of the Treasury, Secretary of the Navy James Forrestal and Senator Joe McCarthy to President John F. Kennedy and Congressman Larry McDonald, America stands like a bleating lamb shorn of its true leadership in Washington, D.C. and as in Rome of old, the venal politicians seeking only personal gain and temporary advantage. Given the data that voting by computer can be pre-programmed, there seems to be no salvation to be looked for in the ballot box. (James M. Collier and Kenneth F. Collier, *VOTESCAM: THE STEALING OF AMERICA*, Victoria House Press, Suite 2411, 64 Wall St., New York NY 10005.)

Even if the votes were honestly tabulated, the mighty media kings can depose any candidate by keeping him from the public view, defame him publicly, or create false knights in shining armor like Ross Perot, who is really but another bossy old billionaire in the Rockefeller “stable”.

Thus, in these perilous times for national survival and racial integrity, it seems the best avenue for hope of redress of grievances is through the courts. A Vietnam veteran, Donald MacPherson, tax attorney and columnist for *The Spotlight*, very correctly and astutely points out that patriots should infiltrate the law schools and send every bright young American to study Constitutional and Administrative Law and take back our country by legal maneuvers in the courts. Ladies and gentlemen, that is how we lost our country in large part... in the courts, from the time President Roosevelt packed the Supreme Court with fellow travelers. It will not happen in a day, but it will happen if such action is taken by hundreds of sincere Americans concerned for their children’s future and their culture’s continuance. *In hoc signe vince!* [“In this sign we shall conquer!”] was Constantine’s slogan when he raised the Cross as his standard in battle. General Douglas MacArthur reiterated his stand for these symbols: the Cross and the Flag.

[END OF QUOTING]

I would take a bit of exception to the above conclusions but this is only an excerpt from a book and, taken out of context, the meanings are often lost in the reprinting. You must understand that the “cross” and the “flag” are also of Zionist origin before Zionism was placed as the logo of the New World Order which actually means THEM THAT RULES AND US THAT ARE RULED! Or, better yet in their own words: “US THAT RULE AND THEM THAT WE RULE!”

WHY THE HOLOCAUST?

There HAD to be a Holocaust, readers. It was necessary to fit the dogma that there be “...all the Jews—LESS 6 MILLION...” The entire premise rests on the Hebrew letter “VAV”. This letter connects and interrelates all 22 letters of the Hebrew alphabet. This letter forms a vertical line, a pillar, a man standing upright. Its name is “a hook” and it represents the NUMBER “6” and within its secret is that it is a single line of light.

The secret of the vav, which is the first letter of the sixth word of the *Torah*, is that it is a single line of light whose function is to *illuminate the darkness and thus is Time itself—present and future*. It is the Jewish People... It is the Jewish people standing together to do God’s will engraved in the heart of every Jew, says Rabbi Yitzchak Ginsburgh.

Does the Biblical phrase from **REVELATION 13:18**...

“Here is wisdom: let him who has understanding decipher the code number of the beast; for it is the code number of the name of [a] man; and his number is six hundred and sixty-six.”

....relate to the gematria of the vav?

Or perhaps that from *REVELATION 2:9*:

“I know your works and your suffering and poverty, but you are rich, and I know the blasphemy of those who say they are Jews AND ARE NOT, but are of the Synagogue of Satan.”

This is copy from the inside cover as explanation of the cover design. [See inset.]

The entire set-up is through the Dogma of Judaism with instructions: “You shall return—*minus 6 million*” (Or, the letter “vav”). In the Hebrew Year 5708 Gematrically fulfills prophecy—**when the State of Israel was founded in 1948**. Therefore to fulfill PROPHECY there is a mandatory demand of “6 million”.

I ask that Mr. Martin forward our comments to Mr. Brock, as requested, and if Mr. Brock would agree after checking with Mr. Weintraub, we would be pleased to take the space and time and offer serialization of the book in *CONTACT*. I apologize for the length of time interim from receiving the book for review and now—but we needed to wait for integration within our ongoing work now underway. The tumult of Zionism, Jews, Judaism and such as “Communism”, etc., is so CONFUSING as to baffle the uninformed and yet so simple in explanation if you know what is taking place here. First in line for being “Had” are the ones who were, simply, “Judaists”. This book in point bases its “calculations” on a system called by them “gematria”. I don’t believe you will find the word defined in a dictionary but it is described in the book itself.

I would go a step further and offer the “description” of the book as sent by the publisher:

[QUOTING:]

THE HOLOCAUST DOGMA OF
JUDAISM IN RELIGION

Not since the Inquisition has any religion been so powerful as to punish heresy with imprisonment, fines, multinational jurisdiction and re-education. The Holocaust is a Judaic religious Dogma and therefore dare not be questioned but must be accepted in **Faith**. How then can it masquerade as **history** if no part of the story may be questioned or disputed or refuted by forensic, scientific, or reasonable argument?

This article of Jewish Dogma is spread not by missionaries and love, but by fanatics with the power of America, Russia and Germany combined for they are not really sovereign nations but servants and slaves of their Jerusalem-Geneva-New York corporate priesthood and UN administrative and police power. (ADL) B’nai B’rith says: **“The Holocaust IS THE KEystone OF THE NEW WORLD ORDER,”** but the world now knows that it is **nothing more than show business—A Holocaust Dogma.**

The premier book of an entirely new appraisal of The Holocaust as a Judaic religious Dogma that was created by rabbis using Kabbalist “gematria” to account for the number ‘six million’ and, more importantly to fulfill prophecy.

This religious origin of the Holocaust Dogma removes it from the legitimate questioning of historians by Western reasoning to Eastern mysticism and faith.

To question the Holocaust Dogma is heresy to Judaism. Excommunication from world approval is swiftly followed by imprisonment or fines in Europe. Can a Jewish religious Dogma be subsidized by America? Order this 230-page book for a new appraisal.

To order: *THE HOLOCAUST DOGMA OF JUDAISM: KEYSTONE OF THE NEW WORLD ORDER*, Send \$15.00 plus \$2.00 p/h TO: *Cosmos Publishing Company*, P.O. Box 15248, Washington, D.C. 20003. [**H: I suggest you make a notation of Phoenix Project and/or CONTACT when ordering.**]

[END OF QUOTING]

We have received our information from Dr. Robert L. Brock, Pres., Self Determination Committee, P.O. Box 15248, Washington, D.C. 20003.

CAUTION: I would caution you readers to not just dive off head-long into the assumption that you now have ALL the answers for you have missed the biggest lie of all—**JESUS**. I do not knock anyone's assumption of a Christed being—but by all accounts then or now—**HIS NAME WAS NOT JESUS UNTIL SAUL (PAUL) OF TARSUS GAVE THAT LABEL TO HIM AFTER HE WAS NO LONGER IN THE HOLY LANDS. PAUL NAMED ESU EMMANUEL BY THE LABEL OF "JESUS" WHILE TRAVELING IN GREECE AFTER HIS ENCOUNTER WITH THE YOUNG MAN. He was NEVER a follower of either Jesus or the Christ. THIS IS ALL A MAGIC AND MOST IMPORTANT FACTOR IN THE MAKING OF THE NEW WORLD ORDER AND CAPTURING ALL OF THE SO-CALLED "CHRISTIANS" AS WELL, INTO THE DOGMA AND STRIFE OF **RELIGION**.**

It reminds me of a writing which Al sent to Paul Krouch of TBN some six or so years ago. It was based SOLELY on CHRIST and did not mention "Christ" by any name so it was quite simply generic writing. The letter was sent back immediately along with a torrid remark that the writer should "return to Jesus". Well, so be it, readers, for you who are waiting for that Jesus Rapture as touted by the Evangelists—are going to end up DEADED. It is ALL part of the PLAN.

You are welcome to believe anything you want to—but I suggest you research all of that which is available before you take someone ELSE'S OPINION about what YOU SHOULD DO.

"Jesus" was the CHOSEN BEING to be built into an Icon and sacrificed in the ending days of freedom, still on the cross a second time, according to the needs of the Court of Satan. There is no more value in correcting only half a story than to leave the whole lie intact. Further, to assume GOD doesn't keep His promises **by sending His messengers to set the tales to correct, is indeed foolishness. WHY DO YOU THINK IT SO ACCEPTABLE TO JOIN INTO SOMETHING AT DIRECT OPPOSITES OF ALL REASON TO COMBINE INTO A RELIGION CALLED SOMETHING AS IMPOSSIBLE AS "JUDEO-CHRISTIAN"!** IF YOU HAVE ONE YOU **CANNOT HAVE THE OTHER!** You can have "**Judeo-Jesusian**" and have done so for generations **BY SEVERAL VARYING NAMES**. A MAN NAMED "JESUS" WAS PICKED TO BE A FULFILLMENT OF PROPHECY

JUST AS HAS BEEN 6 MILLION IN A HOLOCAUST. The name itself has little to do with HEART emotional considerations. You can have a man named “John” represented as a murderer, a savior, a pitchman, an anything-you-want man. The word “Jesus” itself is pronounced in as many ways as there are languages—and it too, IS NOT A NAME—BUT REPRESENTS “ANOINTED ONE”. THE THING TO REMEMBER IS THAT YOU WILL ***BELIEVE ANYTHING YOU ARE TRAINED TO BELIEVE—ANYTHING!!*** Every concept is but an IDEA and therefore, for example, to celebrate the MEANING of CHRIST-goodness on a celebration day or “Christmas” is wondrous indeed for you are celebrating the idea of goodness, sharing and being. To take it LITERALLY is incorrect for, at the very least—you do not have the proper and correct BIRTH-date. It is so important, readers, to have WHOLE truth and not just bits and pieces which further confuse the issues confronting you as a species AND a civilization at the brink of self-destruction.

When you actually study the facts as presented you will find that you have no real separation in what is called Christian and what is called any other DOCTRINE-BASED religion. To have GOD is the only thing that requires NOTHING except YOU and HIM! Religions have forever been THE controlling factor in people-management. If you can confound or convince a man—any man—that there are other men higher than self, you have control and, therefore, religions have the most control of all entities. You are TOLD what to believe, what to worship and how to do it so there comes to be very little difference from one religion to that of another. This is WHY Satanism, which is against all things Christlike and Godly, is accepted as a “religion”—because it actually has no more or no less meaning than any other controlling religious ORDER.

Why do you think you have tax “exemptions” of money for giving to religious organizations? It is BECAUSE ALL THE FUNDS END UP IN THE SAME PLACE—THE CONTROLLERS’ HANDS AND POCKETS! ***THINKABOUTIT!*** “GOD” doesn’t get your tithes and offerings! God will always provide the reward of return and blesses your SHARING with those who march to HIS Angel-drumbeat. GOD also expects you to become informed so that you rationally and in wisdom move along your pathway and not just “into” something new and possibly different. Have you not lived long enough in the *fairy tale*? You who say “God wins” are correct. However, if that means to you that some man, Jesus, “wins”—you have no meaning to your statement for, at best, a MAN named “Jesus” was the human physical presentation of whatever you choose—NOT THE ENTITY OF GOD. Until you KNOW the difference, you will be waiting for something which CANNOT and SHALL NOT come in TRUTH upon you or unto you. AND THIS, DEAR ONES, IS THE DISILLUSIONMENT OF YOUR YOUTH—THEY SEE YOUR LIE SHOWING AND MOST WON’T BUY IT EXCEPT IN MOUTH SERVICE TO STOP PARENTAL-SIBLING QUARRELS. IF YOU DO NOT ALWAYS LIVE THE THINGS YOU CLAIM TO WISH TO TEACH YOUR CHILDREN—YOU ***ARE*** THE LIE AND, BECAUSE YOU DO NOT, PROVES THAT YOU DON’T ***KNOW*** TRUTH.

The adversary of God doesn’t care that he wins the war of freedom—for his whole intent and thrust is toward controlling the destruction of mankind AND whatever he chooses. This entity of life destruction depends on you to accept the role of the FOOL—after all, you always do! Just as you have to have 6 million in a Holocaust to fulfill the prophecies—so too did you have to have a sacrificial person to fulfill prophecy for *New Testament* expectations. When a story is told often enough and long enough it becomes accepted, no more and no less. And remember something, good friends: GOD DOES NOT CAST YOU INTO PRISON FOR NOT BELIEVING THE LIES, NOR DOES HE WIPE OUT NA-

TIONS AND CIVILIZATIONS TO FORCE A RELIGIOUS ORDER UPON YOU. THESE THINGS ARE OF “MAN”.

We can speak until there is no longer breath and it would change nothing IF YOU DON'T OPEN YOUR MIND AND SEE AND HEAR. YOU perpetuate the lies by changing your attention from one absurd scenario into that of another. Until you WANT to learn TRUTH and are willing to accept some altered concepts—you change nothing and will continue to wallow in the mud-bog. I am continually astounded at the numbers of authors who seem to have a real grasp on one side of the story—but who so completely fail to see the other side of the trap.

So, you might ask, “If this be true, why do men act as they do, say, in war?” Simple; because they are TOLD WHAT TO DO, WHAT TO THINK AND HOW TO ACT—under penalty of death in one form or another. You are, as we write, sending combat troops to Bosnia. Those are not just troops—THEY ARE YOUR OWN FLESH AND BLOOD, and you act as if “Oh well...!” You do it in the name of JESUS/CHRIST and goodness—to kill, maim and ENFORCE a New World Order bunch of Slave-Masters. Come now—you allow it for you already accept your status as robotic slaves to the “Master’s” wishes and orders. You in the U.S. are without government RIGHT NOW and it hardly is even mentioned in the news, except for the silly nonsense among about four entities who are alone now to make whatever laws they want—to further CONTROL you-the-citizens. The CONGRESS IS ON VACATION—PAID VACATION!

I suppose my suggestion to the authors of such a book as is considered here is to BE OPEN ENOUGH to FINISH your task of uncovering TRUTH, for if you only pick and choose the lies you wish uncovered, then you are no better than the Elite perpetrators of the history of mankind into LIES. If your lie is simply bigger and brighter than the lie you disclose, how is this TRUTH in GOD? If you demand the right to uncover truth about Judaism and Zionism—then go ON AND UNCOVER THE TRUTH ABOUT THE LIES OF CHRISTIANITY. YOU WILL FIND THEM ALL TO COME FROM THE SAME EVIL-SCHEMERS FOR THEY “WERE MURDERERS AND LIARS FROM THE BEGINNING AND THERE IS NO TRUTH WITHIN THEM”!!!

It matters not how many times the language is changed in a presentation—if it is not truth in the beginning then it is simply representation and translation of LIES. And ALL is but a concept of THOUGHT! So, how IS YOUR thinking these days?

Dharma received some most interesting things as sharings of love and care at Christmas and among the thoughtful gifts were two rather large boxes—FILLED WITH DOZENS OF THINGS. Interestingly enough, these individual items, even to a lemon rasp and clippies, were chosen with loving thoughts, paid for with sharing hearts and sent with love and humor, great expense just for shipping, and the boxes of packages became puzzles in their own right as nobody can get them repacked into the containers as did the shipper. Well I can tell you now, each item is cherished in the receiving as was the wonderful thought of the sender WHO WANTED TO SHARE. We are humbled by the thought of each little thing, not as a commodity to return and get worthless tokens in exchange. The items gathered their VALUE by being selected and shared in each’s own tiny contribution to JOY. There can be no PRICING of a jar of lovingly made jam, a flower—or a chosen gift because the sender cared enough to SEND A LOVING THOUGHT IN HOPES THE RECEIVING WOULD BRING PLEASURE AND HOLD LOVING THOUGHTS
