

161<sup>st</sup> Knowledge Seekers Workshop -0302-2017

<https://www.youtube.com/watch?v=rgXpCKbvuuug>

Transcription courtesy of Lynn of Montana, with introduction, hyperlinks, timestamps etc. from Corn of NZ, and then final polish and edit by Michel of Quebec for publication on [www.transformacomm.com](http://www.transformacomm.com) where the whole transcription can be downloaded in word or pdf format.

Workshop 161 is in a way a follow on from the 1<sup>st</sup> 3 workshops of 2017 and dips deeply into the role of the emotions and the soul, and how we must move on from just making the nano and gans materials and start interacting with these materials on the level of our emotions and soul. This touched on many points and it was quite difficult to assign subject headings, so I have just gone through the text and hyperlinked key phrases as in the headings following... This is what will be taught at the new Space Centre in Accra, Ghana, which is now under development. The workshop is then deepened further by some great questions, and then Jacky presents the workshop they have just done in France, and produced 85 new reactors (as in the picture) near Lyon, with all the proceeds going to the new Space Centre development in Ghana.

[We are in a massive move in delivery and development of new technology and conditions as well as facilities.](#)

[Thanks to those trying to disrupt the Kf, for their activities!](#)

[We have to move on from nano and gans and start looking at how technology develops in space](#)

[In the last teaching I talked about understanding the impression of thoughts and emotion.](#)

[Close your eyes and try to see without your eyes](#)

[Deep space opens the soul of the man where the physicality is the boundary of the confirmation of the existence of the internal strength in the soul of the man.](#)

[Good news received from the new US president that aid to Africa will stop](#)

[We have to understand how to see without the eyes and how to feel without touching, tasting.](#)

Those who incite wars have been excluded.

The freedom of physicality has suppressed the power of the soul and the emotion.

Now you understand the point of maturity.

Carolina and I here in Africa see a lot of things. We see a lot of pain but we see a lot of serenity

The life of the man won't be 60 to 100 years as you are used to but thousands of years

The spaceship institute in Ghana will become the focal point of humanity and the door into the universe.

We teach you and we start slowly to try to practice in what I call the sandbox with your emotion

Then start interacting with the gans. Don't make everything like a big soup and you don't know what is in it.

The journey of the man into space is going to be horrendous because man will learn that he cannot hide anything.

We thought we were the 'top dog' of creation when actually we are the bottom eaters of the totality.

From now on the race is on for man to know his own soul and the connection of his own soul with his own emotion and physicality

Azar asks a question about interaction with Gans

Vernie tells how to mix and interact with different Ganses

Uanus from Greece asks about the mass of mixed ganses

MK explains magnetical and gravitational interaction on the white board

A question about the different bodies of the man

[Pavel from UK asks about creating Gans with the human body as the container](#)

[A question about the Djinn](#)

[Jacky presents a French teaching workshop](#)

[We started from Africa as a human race, and maybe Africa is the place where we go to space as well.](#)

[More details of the Space Centre development n Ghana and what is needed](#)

[We are in a massive move in delivery and development of new technology and conditions as well as facilities.](#)

1230 Mr. Keshe (K) of Keshe Foundation (KF): good morning, good day to you wherever and whenever you listen to these Knowledge Seekers' programs. As you are aware we are in a massive move in the direction of delivery and developing new technology and conditions as well as facilities for development. The KF project in Ghana has taken the next steps that we have now appointed the architects and builders of the site. The plans have been given to them for the site and we have 250,000 plus square feet to development. It will come to flourish and in the coming weeks we will release the designs of the architects for the land and what is to be developed. In a way you can all participate in it with what you see and what you would like to share.

1343 K: in the coming times the site will be set up to develop for one nation development. We are all worldwide One Nation. You can all participate in the development and ask for it to see if it can be done. We rely on your knowledge and expertise to guide us. You have to understand that this is international work to become One Nation. The properties to be done in stages of what we have been asked to do on site are a clinic as a priority. Then the factory will open at the same time, the research center and the space launch laboratory will be next to it.

1443 K: this becomes pan-continent work and we all have to participate in it. As I have said before, once we show the plans and people understand the momentum will start. We have already seen donations coming in for the development and the funds are earmarked for that purpose. This allows us to do it. Donation cannot only be financial but can be donation of thoughts, knowledge and of time to do things that can be brought into Ghana.

[Thanks to those trying to disrupt the Kf, for their activities!](#)

We have seen those people who are trying to disrupt and are calling on the newspapers heavily. We had a meeting with the newspaper yesterday and they said they said they had so many calls and they just told them to get lost. People across Accra in Ghana are benefiting and these callers are nothing but terrorists.

1537 K: Especially Mr. Sylvester your activities with the newspapers are being followed and have been reported. The press was very impressed by everything that they see as the benefit for Africa. This is the game of those that are trying to stop the progress. We are One Nation and we see and monitor and talk with securities regarding people. In time we will pass these shortcomings and short sightedness of these people benefiting only in their pockets. We will develop and we will go further.

1624 K: I have been asked why I don't comment anymore regarding DL. This is now in the hands of the prosecutors and is highly involved in pan-European actually pan-world securities that we cannot disclose any more and you will find that we will not discuss anything further on this matter as prosecutors in 3 or 4 nations are working heavily and we have been told not to make any comments. It is not that we have stepped back but it is that we have been told there are massive investigations into bank accounts in the Cayman Islands and other places set up by DL to defraud taxes in European countries. The responses have been from the prosecutors and not us.

1712 K: So when you see that we don't comment it is not from weakness but that we have been asked not to give information which has been delivered to securities and their governmental offices that shows the plan to defraud goes back to the 1990s. This is not something new. There are other companies in Luxemburg and Australia in the hands of the authorities in Europe showing how DL and his team have defrauded the government. In due course these banking and defrauding documents will be released on *Facts about Dirk*. You will see that he is highly tainted with all sorts of things. Please do not take this as weakness; we have to stand firm on the instructions we have from the police and other prosecutors in completing their affairs.

[We have to move on from nano and gans and start looking at how technology develops in space](#)

1810 K: in respect to development of the technology we have to go further and start looking as it takes time for you to understand how technology develops in space. We have done the groundwork with the gans and the plasma and we have done every other thing that is possible and we have done everything that could bring insight into how the ultimate goal was to see the interaction of fields. As I said before we started with copper and nano coated it. Then we created the environmental condition that the nano coating became gans. Then in the production of the gans we came to understand the interaction of the fields of the gans with each other on the body of the man, on the environment and on the production of material.

1910 K: These were the step-by-step teaching to mature the knowledge. Don't forget that we started with a few. Now there are those others that are coming in the background as you are teaching more and more and they are catching up. The numbers are becoming an avalanche of knowledge seekers. It is coming to a point for us that we don't walk into meetings with scientists trying to prove a new technology. Now the issue is *how can we go to the next step faster?*

1946 K: We are setting meetings, more or less on a daily basis, two or three a week, with high ranking scientists with different governmental organizations. We are not proving the technology any more. It is what is the next step? What do we need to learn to be part of it? What needs to be done to bring nations on line so they can develop? This pressure comes on you and I have done my work. This national teaching across Europe, Asia and Africa comes to you. The Knowledge Seekers' programs you are running and the workshops you are running has to be not only making coils, ganses, but understanding and teaching what is to come because of it. This is the point of no return.

2040 K: what is this technology going to develop? What is it going to bring to humanity in the progress of the understanding of the universe? This is where we are coming to. It's not just making coils and ganses. You do coil making, gans making and nano making all as a small part of the teaching. When you do workshops in the first couple of hours explain it and let them feel it. You have to enlighten your knowledge seekers on what is to deliver and what are the interactions with my body, your body, the trees, and the fish? In a further step we have to teach how we connect with others beyond the boundaries of this planet. We are like a little fish in the ocean of the universe or a tiny amoeba. We always thought the whole ocean of the universe was our world, and we

were happy with a little square pot. Now the pot has opened and we will see greater dimensions of existence.

2155 K: We came from individuals to village life, to town life, to city life, to country life and then we made the continents and the planet. Now the next step to the universe is opening. It is the job of you to enlighten people and not just for the cancer and the energy but for what comes next now that we have everything. This is where your teaching becomes enlightening, when you can share knowledge and put it in the hands of people who can bring change and transformation for humanity.

2237 K: what are the other things we do? [In the last teaching I talked about understanding the impression of thoughts and emotion.](#) For example we looked at putting different ganses of different slight mixtures of Zinc maybe with a slightly different mixture of salinity strength and maybe two different types of zinc from two different salinities from two different salts. Then we can see which one is the emotion, and of which strength. If you make the gans of salt with potassium and then you make a gans of salt of sodium would one be the strength of the emotion and would the other be the strength of the physical motion? Don't forget that in the body of the man the motion expansion and contraction comes from what we call the pumps—the sodium potassium pump. That is the physical one we are looking at. On the other side is the strength field of the matter in the pumps of what they call it.

2255 K: so it is now time for us to develop the knowledge of the interaction of different strengths of the same material in different environments. Would the gans produced by sodium chloride be the same as potassium or is it slightly different? Would one of magnesium be of the happiness and one of the potassium be of joy? And would the other one be of sorrow? The real work of space technology starts now. We spent years showing how to be born into the world of plasma and how to start to 'crawl.' It is time to stand up now and observe and understand the situation and the physicality of the work of the plasma. Standing up means to be prepared to take the steps up the ladder of the knowledge of the universe.

2503 K: this is our job; from now on we go back to nano and to gans just for referral and a 'sweet old time.' The new life and the new depth of information has to be gathered so that by the time we finish the space institute buildings in Ghana, we understand the teaching that we are ready to take in the expanse of the universe, not like *Oh wait now! Do you know how to speak, do you know*

*how to see, and do you know how to interact?* The teachings from now on will prepare man into that destiny. This is our job from now on. You still have to teach the gans and the nano making but it has to become a small part so that the enlightenment of the beauty of the future and the span of the universe and the peace on this planet become the goals.

2556 K: this is where KFSSI and KF teachings come to one point and merge as one. In the time a few weeks ago we explained about emotion. See which layer will move. See which bucket with which gans will rotate slower or faster. When you feel it, when your emotion interacts with the fields of the plasma of the material. Now consider if you have these different boxes in front of you and you see your joy translates to slower or faster motion of one of the containers of a given gans, now consider that container as one of your brothers in deep space. He feels your emotion of happiness. This is not as you are working with a box; this is a practice to see how your emotion is transferred in the dimension of the gans to another entity.

2727 K: the ultimate goal will be to reduce everything to the gans of hydrogen but we have to start somewhere. One of the biggest problems for man will be the trust in the emotion and the dimension of observation without the eye. We have to come to rely on the feelings and our emotions more than the eyes. We will see through the light of the soul not through the eye of the man. How can we do this and how can we practice? How can we make a sand bag that we can practice with? Go back to the understanding on the work of the gans. Go back to the principle of the CO<sub>2</sub> box. On CuO and ZnO you didn't get copper or zinc, you got the CO<sub>2</sub>. Start playing with the mixtures so you understand how you can control your emotion in respect to the environment you have created and how you can transfer this knowledge to what you have created. .

### [Close your eyes and try to see without your eyes](#)

2904 K: Put the camera and close your eyes. Use the communication of your emotions to see and see what you see afterwards. It is the same as what you see in the camera in your recordings. Put the box of gans in front of you when it is in motion, and try through the emotion without the eyes to develop your senses of beyond the boundaries of physicality but through the fields. Let me explain to you why you need this. In space our horizon is very, very short. Even though we can see into deep space we cannot see the details. At the speeds we travel in deep space our eyesight becomes nothing but blurred things that as we say of the experience on this planet: if you live in the western world and listen

to the news sometimes when the news goes out there is a little notice that warns: *please be warned there are flashing lights in this report.* What does this mean?

3040 K: with many people rapidly flashing lights are the information that enters the eye and by going to the brain and the brain not being able to decipher the amount of knowledge and light that comes together, you go into seizures or epileptic attacks. That is why people with migraines and epilepsy are advised not to watch movies with flashing lights. When the brain cannot decipher information to react, then it produces information that the physicality cannot accept and it switches off. You call it epileptic attacks or seizures.

3125 K: now imagine you travel in deep space and at the speed you travel the light that travels by you is beyond the comprehension. So the survival teaches you to close the eyes. But how much can you close the eyes? And when you close the eyes how are you going to trust the environment you are traveling into? The fear of the unknown becomes the fear and the noose around the neck of the man for his survival. That is why you have to understand that we have started teaching in understanding without the vision. This way we won't see a horizon line of 17 kilometers or 17 miles but you will see into the depth of the universe. The brain of the man has been developed in a way to work with this. The man in the fear of his own understanding has never opened the gates of the brain.

3238 K: the evolution of the brain of the man will be horrendous. We will see the shrinkage in the physical part but we will see expansion in the emotion and the soul of the man. In a way the brain of the man will become like a jacket turned inside out. Because we need more of the emotion and the strength of the soul to be able to see the higher speed and higher strength fields in deep space so that we don't see 17 kilometers but we see 17 light years ahead of us. This is not fallacy. The man will understand this when he comes to go to space. It is part of us who have ignored the existence to confirm our existence in the physical world

3341 K: [Deep space opens the soul of the man where the physicality is the boundary of the confirmation of the existence of the internal strength in the soul of the man.](#) How do we judge? Passing so many lights so fast becomes incomprehensible to the brain of the man. The only thing he can do is to increase the dimension of the higher speed of the order matters that can read and decipher the information that comes to it. The brain of the man burns out

with a little bit of stress and we call it a stroke. Imagine how you are going to handle this unless you bring the strength of the level of the emotional part of the man to be more or less the totality of the boundary with a very small bound for its physicality. This is the secret and this is the key.

3505 K: we have to and we will train our people to be able to do this. By the time we take into deep space we have to understand the control of the emotions and we have to understand detachment from the physicality of the body of the man as it is on this planet. We have to learn the peaceful application of our own emotion and the interaction of our emotion with our souls and other souls. We are moving away from physicality where physicality is just the manifestation of the confirmation of existence of something in the environment of the others. Deep space is so beautiful and it is for man to discover it.

3603 K: it is for man to trust in it and live and obey the rules of the universe. We have lived in it for millions of years. If the man learns what we know man will follow blind because this is the Promised Land and it is deep space where man finds peace in every corner. This is what our work is from now on. We have to raise the level of humanity in totality so that one does not fall behind. My work will show this in the coming weeks. The foundation will make the effort pan-continently to raise in one level the whole of understanding. The KF management team is getting prepared for this to be able to handle this in the coming months. In time we hand over the whole control to the World Council and then to the Universal Council.

3725 K: we prepare the ground and it is our job, those of us who always talked about peace, and wanting peace, and not to fight the war makers, but to prepare the ground that they become irrelevant. When I don't need arms you can produce as much as you like. When you don't sell you run out of money and you stop.

### [Good news received from the new US president that aid to Africa will stop](#)

3750 K: I had one of the most beautiful news coming from the new United States President. Because the African leaders are so corrupt we are going to stop aid to Africa. Thank you very much your Excellency. This is the wish of Africa. When so much so-called cheap food has been put into Africa then the African farms are not worth farming any more. Now don't send any more aid so we can go back to producing what is needed by this continent. At least it is one of the sensible things we have heard from the new president. We thank

you for it, if the American farmers allow you to carry this out, because they have made a lot of money off this false economy of farming.

3847 K: this is what we need to have, what we have to do and what is needed to show that we do not need to be bound to the material physical world for food. This is what we have to offer from the bank of the knowledge of the plasma technology. The teaching must go on; you cannot stop teaching because among the ones you teach will be the future men and children and the life to carry the information of the existence on this planet into the universe. Nowadays we are happy to say we are from Iran or the United States or China. In deep space we say we are from Earth.

3942 K: When they ask you why you are different colors and shapes it is because you have different environments. On your planet you have one environment and you all look the same. The planet earth is beautiful. It has the diversity and allows the diversity of the existence but union in thought and action. The way we invite people from other countries to come to Italy, France or Africa to see the beauty of what we have, this is what we will do in space. Come to earth and see the unity of mankind.

4039 K: [We have to understand how to see without the eyes and how to feel without touching, tasting.](#) We don't need to eat another entity to see how it tastes. If he likes he gives us the texture of his feeling for us to know how it feels. I always refer to an old movie where a famous actress who in her childhood was white, blond-haired, and blue-eyed with dark black eye brown skin, and it says *can I lick you, do you taste like chocolate?* Man has to pass this border to taste and learn how to use his emotion and his soul to share and to feel, to give and to take. This is where the real job of the spaceship institute starts.

4202 K: KF taught the work of the man on the planet. KFSSI brings out the connection between the two and the spaceship institute opened the door into space. But the real dimension and not in clothes and how you have to be trained for seven years to be able to tell one screw in one position somewhere in space. As I was talking in the medical teaching yesterday, when we go into space there is like the fear of jumping in the water and being afraid we might drown. We have never walked into deep space without any cover.

4302 K: The fear of death has prevented us from testing. But in fact if you tune your brain, emotion and soul together, when you leave the boundary of what

you call the space ship, you adjust yourself into the environment you are walking into. There is no need for a space suit and practicing for 7 years. As I always say how many of you have been to a training school and you had to be able to pass a test to be able to get a flight to go from lets say China to India? We have accepted that the conditions are made for the same as we accept and we buy the ticket and walk in.

4356 K: but now the ticket is for man to understand his own emotion and soul and how it connects to his physicality in respect to his environment. Would we open the schools and instead of jumping in the pools and see how you behave, we jump or enter into the environment when the plasmatic magnetic field changes and we have to change to it to see how much we can change. Where is the weakness in our emotion in respect to the environment so that we can survive it? We don't need a space suit; this is what you will receive in Ghana Spaceship institute. It will come very easily like the way you go for a driving license in the development of your emotion in respect to change that in space you learn how to survive.

4450 K: if you like to stick with a space suit, no problem. There is nothing wrong with it. But if you decide to work without the oxygen that you breathe but receive the energy of the oxygen so that your amino acid can survive you will be taught. You will teach yourself. The horizon of opening space for man is beyond man's imagination. It has taken us between 3 to 10 years to walk you from matter into plasma and fields. I hope I don't have to wait 1000 years for man to change to learn that space is safe. It is man who has put the barriers around himself. You don't need to go through the evolution of changing. The brain of the man has a common denominator and that is hydrogen. The beauty of it is as I explained in a teaching yesterday, the existence of nitrogen allows you the conversion and application of the release and absorption of helium.

4601 K: or if you look at the helium the interaction of double hydrogen is deuterium. In fact in deep space your whole body will behave as one. Your structure of the plasma will behave in a way that it behaves as multiples of deuterium. So the whole body interacts as the soup of the universe. Look at Carbon 12; there are 6 of them; look at nitrogen 14; there are 7 of them. Look at oxygen; there are 8 of them. Put them together and you have oddity. What is the oddity? It is the hydrogen again that allows for the transformation in the condition of the plasma strength in confirming the existence and the line of communication.

4742 K: we have to understand that by fluke or accident or the position of the planet the way it has been tilted, in its gas composition and in its matter composition the human race has been given a unique position to be able to live in the spans of the universe. If we understand this we enter into the next level of being able to live at least for the next few million years until man matures into the next step to be able to move from the universe into the unicos. I have been asked before if man has ever been to the unicos. Yes, some of our ancestors who have come across and been in the line of communication have made the journey through and with the others. I have been asked if I can clarify if there has been or if there is a contact with the human race. Yes, there is, especially in the recent past at the highest level irrespective of governments especially those who are in a war zone.

4929 K: [Those who incite wars have been excluded.](#) Those who support peace and sharing of knowledge, communication are taken step by step so that the mistakes of the past are not repeated and it stays with only a few elite. We teach from the bottom and attain being enlightened at the top so that we do not create Christianity for the satisfaction of some and for others at the top to still be in charge and control. For those who don't understand go back in the teachings. I have explained how Christianity has become what it is through the Roman Empire trying to hold on to the hidden path of beliefs that they learned from the Persians and at the same time allowing, by fitting it into what the common people wanted, making a fake presentation of the truth.

5039 K: this time this cannot happen in space. We work on both levels: enlightenment of man from the ground floor to the top and in a way not enforcing but teaching the world leaders that the time to be all equal has come. The people on the ground are learning what some (elite) think is theirs exclusively. My confirmation goes to the leaders of China. You understand exactly what we are talking about. You have to understand the education has to come this time from both sides—from the top and equal and from the bottom in understanding the equality of man in the level of the soul. One cannot abuse the other. There are no kings in the kingdom of God except for Him.

5150 K: you have to understand and start testing your emotion. We have given this privilege to the Universal Council members and we have given this as a right to the member of the World Council. The right of the insight into the universal community in the slow space and time will become the rights of the members of the World Council so that they can see and understand the interaction of both. The Universal Council members possess it as long as they

are members of the Universal Council. And thereafter they will not even remember because as we said, *My wish is my command*. The command of the Universal Council is to bring understanding amongst man in understanding of his totality where the Universal Council is to bring everyone to the same level.

5255 K: the work of the World Council is to be able to unite and unify both sides of the Universal Council and be in the universal community. They are the chapels of wisdom, but the wisdom of the universe. In time they will translate. You have to teach yourself how to see without the eyes and how to feel without touching or eating and without smelling and putting your finger in there *'if I touch how does it feel.'* Man will come to understand in part and will become like the Clown Fish where he mutates between the male and the female as he needs to. We have to learn that these are the processes that embedded in the soul of the man and in the physical dimension we have tried to ignore them.

5410 K: [The freedom of physicality has suppressed the power of the soul and the emotion.](#) With this technology we are opening the reverse because that is the way the universe works. Make yourself ganses that are at the level of the emotion of the man and ganses that are the level of the soul of the man. Make yourself ganses at the level of the emotion of the vegetation and make the ganses that are at the level of the emotion of the solid as they are still the same as the stone. Try to see without the eyes and see how your interaction will bring reactions from them. Do they move further away from you? Would the gans take a dip and move away because it wants nothing to give but needs to be further away to be in balance. See if when you give with joy the whole gans moves to one side towards you and wants to be closer because you give what I need. These are the schools of the training of the man for deep space.

5529 K: in the next few weeks and months and more and more of you who practice, then we will open the schools of the space institute in Ghana for man to be to enter the kingdom of God. When you decide, you see through the eye of the soul and not the two holes which are not even worth opening with the body of the man. The real teaching of the spaceship institute has started as I said, from Christmas and slowly, slowly we are building up the opening up of the knowledge.

5615 K: those who get enlightened will join in. Those who still need to be attached to physicality will still be there and those who teach will be enlightened to teach more. Try to practice how, and try to see in which way you can communicate without the physicality. Try to taste the CO2 gans and

then try to put the CO<sub>2</sub> gans without touching it, feel the energy that it gives and taste the pleasure of what you did. Try to do what was done before where you put the orange, the amino acid, the CO<sub>2</sub>, the CH<sub>3</sub> and the CuO around it with the ZnO and you drank it and it tasted like an orange. My God, your body is the water and contains the water and contains the ZnO, and the amino acid. If you have matured enough when you look at the orange you feel the taste of it. You take the energy it is prepared to give without your touching it.

5745 K: [Now you understand the point of maturity.](#) You had to transfer the taste of orange into water that had these plasmas around it. Your body is made of that plasma. The containment of the glass of water is the body of the man. Did you need to consume the orange? Or did the orange stay intact with what it gave out and you took and tasted the energy of it. You had the pleasure of its existence without consuming it. This is the maturity of the man in deep space.

5832 K: *Thou shall not kill.* You have done all the experiments in the physical dimension. All I am doing is connecting the links to the emotion to understand you are the cup. You are the Holy Grail and you never knew it. The body of the man contains everything; it is the man who has to know how to tap into it and we have opened the knowledge so that you can see because you have tasted it. When you see the work and where you put a few dynamic things together and you get the matter, do the same with the body of yourself. The blood in one hand and the other is a dynamic plasma with the existence of the current. Make your emotion to see that in the hand if you wish to see gold you will have gold in the palm of the hand. The power of the man has been shown to you by Peter. The plastic which collected the metals is the palm of the hand of the man.

10011 K: The two coils is the hand and the brain of the man outside with its emotion dictating what it wants to see will create the materials you need, even into existence in the hand of the man. Now you understand and you have been fully through the school of teaching. Man has every knowledge from now on how to do what has been his wish but has never been connected to himself. From now on we connect and we bring examples for you to understand. *I have done this but I didn't see it. Now I can do it.* Put a lover in front of you and see how much love you can give and see if the love is reciprocated. Or is this the true love? Then you don't waste your time loving an idol where there is no reflection of the emotion back.

10139 K: man will participate in creating the new generation of beings in the universe in the interaction of the soul and the emotion of the man with other entities where in physical life it is impossible. The children of the universe are made of every race in the universe of those who understood this interaction. Making love and the beauty of the offspring does not need physical interaction the way the man has gotten used to it on this planet. I said to Carolina many years ago that we come to this planet to the physical dimension like this to enjoy the touch of physicality where in fact we are committed to the dimension of the soul of the existence of the universe.

10249 K: [Carolina and I here in Africa see a lot of things. We see a lot of pain but we see a lot of serenity](#) and we see a lot of self control in the understanding of the emotion and through it the fear that existed and confirmed in their souls that it can be controlled. By one little man some call Christ and some call Mohammed, here in Ghana they call it witch doctor. Control of the emotion through the soul of the man is a miniature version of a bigger structure. But in fact they work off the same thing. The man has got to go through this barrier and has got to go through the point where he trusts in his own soul and sees without the physicality. This is the job of the KFSSI and Keshe Foundation and that it is to bring man to that level so when they come to spaceship institute they are mature enough to enter the next dimension which is the detachment from physicality but understanding the totality.

10406 K: not many will pass this level. Not many will take the journey. In the past when I discussed this that we are here to save those very few there was an outcry from Carolina and Doctor Kostova that we could not leave the children behind. *You have to take all!* We give the opportunity to all. It is for the soul to choose. Maybe now they understand. Maybe now they comprehend what is to come. The choice is given to the man. And it is for the man to take the next step. Stay within the confinement of the pleasure of the physicality of this village of earth, or take a step to see what the village of the universe in the world of the unicos has to give. Once the man starts traveling the spans of this universe he will find out it is too small and he can travel faster from one into another. I've seen this many times.

[The life of the man won't be 60 to 100 years as you are used to but thousands of years](#)

10534 K: Because the life of the man won't be 60 to 100 years as you are used to. It will be thousands of years and you have time to be everywhere and learn the speed of the transformation and the speed of transportation. Then the shell of the life of this universe becomes too small. And then we start getting that itching foot to see what is behind the line of this universe. Then we have to learn the rules of the unicos, which is totally different, but very similar to what we learned in the village of the earth. You have to learn that in the village of the unicos each village has its own behavior and its own environment. It is like when you come to Africa and it is hot day and night. When you go to the North Pole it is freezing. It is the same in the dimension of the unicos. Each universe has its own composition and that is why it stays in that direction and in that dimension.

10642 K: it is for man in the future to learn how to adapt in the new dimensions. But, you will find out by carrying the basic fundamental hydrogen as part of the existence man has already been given a key into the level of existence in the unicos and he has to graduate and go through it to understand it. For some it will take a few seconds and for some it will take centuries of travels for millions of years and they will never succeed because they have not matured in the inner sanctum of their souls to see the totality of creation. Try to practice and make as many different ganses and see how you can influence those ganses which are matter level and those ganses which are emotional level as well as those ganses that are in the dimension of the soul of the man.

10748 K: And, start testing yourself and you will be graduated when you come to the school. This is very much like what we call the evening classes. You practice and teach at home and come to the institute to graduate. And we will teach you the final part. There are no failures. There is just the lack of understanding that gives us limitation of the existence. Try to teach as much as you can. It is upon us to build the spaceship institute. I have put all my effort into it and you shall see it.

10845 K: [The spaceship institute in Ghana will become the focal point of humanity and the door into the universe.](#) I have made my commitment. I stay here until my dying days but I teach the man how to enter the Universal council and how to enter through the Universal Council, the World Council and through the respect for them to see the door and the opening in the universe. You cannot open the key to the universal community if you have no respect for where you came from and understand that when you take into the world of the universe you are the ambassadors of this planet.

10943 K: ambassador means the representative of the president and the leaders of your nation. So you have to carry his integrity and his ethos. Nowadays we have 180 countries and we have 180, if they can afford it, ambassadors in each nation. Not many nations can afford that. Now that we open the expanse of the universe there are billions of stars and galaxies and cavities of creation in the universe that 7 billion men are not enough to have an ambassador in every corner. We don't want to be out when they say the white guys from that planet have come. The ambassador has to be the one to say that the man of peace has arrived and they understand the work of the universe and abide by it so that we stand as a beautiful rose and not as a thorn in the back of the Universal Community.

11058 K: [We teach you and we start slowly to try to practice in what I call the sandbox with your emotion](#) and find out what gives what emotions of you in different boxes. Bring the boxes together, then separate them and feel, give them the emotion and see how they interact. Then close your eyes and make a recording of what you want and what you see, and then make a further test in wanting to touch to reach without reaching, you touch and you feel. The size of the body of the man will be the extension of his emotion. Now we learn to do this in the freedom of space.

11204 K: Teachings from now on is at the spaceship institute level. In a way you have all been around to upgrade yourself very rapidly. Playing as the king in the garden of the earth is over. Now you are in the first class and you have to learn how to hold the pen and to be the pen of peace. You have to learn where to sit that it becomes the seat of justice. You have to learn how to speak so that the soul of the man speaks without the word of the man. Then I will take you to step number 2. And by God's name I hope this won't take centuries; I don't have the time.

11310 K: try to practice and try the way you are happy and record it so you can start teaching yourself the control of the emotion, the taste of the food, the energy of desire and the physicality of the touch without the touch. I have taught this physicality touch many times. You remember what I tell you to put your hand out and count and send the information to your finger but don't move it. Do it the second time and don't move it. Just relearn how the information has to go. The third time do it and send the information and move it. This was practice for you to see how you could send the energy of touch and

movement and feeling without the physicality. Now you see I have taught many things but you looked at the physicality. The aim was to touch the eventuality of the control of the emotion without touching but being able to feel without actually getting there to touch to be able to do something wrong.

11432 K: we stop man from doing anything wrong. It is for man to understand it and to practice it. Try to make as I have explained to Armen recently and in one of the teachings, to practice multiple gans making. What does this mean? If you remember a short time ago we sent some 6-sided gans boxes and they had plates you could put inside or outside. Do the same. Instead of having copper nano coated and the zinc non-nano coated get a big square box. Put one plate in front of the other and change the salinity in one part and put some salt in another part. And gradually allow yourself to build up the emotion of the condition. Because now you had a copper plate, you had a zinc plate but this time you have a nano coated zinc and a copper plate that was not nano coated. You have iron that is nano coated and iron, which is not nano coated. You have the salt of magnesium, the salt of potassium and the other salt.

11610 K: [Then start interacting with the gans. Don't make everything like a big soup and you don't know what is in it.](#)

Start practicing step by step and you will find the key to the universal community. Try to connect a nano coated copper plate into the iron non copper plate and the iron copper plate with a direct line that is nano coated and see what happens. Connect the magnesium to the amino acid part and see if you change the color to green using the iron as the source of creation of the hemoglobin. Will you see yourself in the color of green of the Martian in the box and say *I can hear you now that I am green*. Somewhere in space you have to change or you look green because of the interaction of the fields in that environment that allows you to confirm your existence.

11725 K: the color white does not exist in space. It has been in the imagination of man for confirmation of the stupidity of superiority. The color of the universe is transparent without any color. And the power of it comes from its transparency because you can never find the real essence and the point of the source as every point is the source of its own. I teach you from now on the language of the universe and it is for you to catch up if you don't want to be a tomato as they say.

11814 K: it is for you to move on. For those of you who are on the edge of understanding the technology of the foundation, you have a race against time

and the clock is ticking. Teach and show. Instead of just showing a gans box, show the conformation of different gans boxes and let people now sit in front of this and show me how I feel in respect to this box. Is this the box of my joy, my anger, my happiness, or my feeling?

11853 K: There are seven of you who were in Descanzano with me. You sat for this test and those of you who were the murderers knew on the spot because I put them on the spot. I made a star formation and I put two detectors facing each other and the student in front of it. I sat in front of the monitor and I asked questions. And the truth was detected in the level of physicality. Armen can tell you as he sat for it. And the others. I knew what I had in my hand by sitting them in front of the level of their own physicality—these were the liars, the cheats and the murderers. I knew the Judas in front of me sitting in front of the box. There were two of them. There was one and then the collaborator. They know who they are because they know the test they sat in front of.

12030 K: now you become the gans box and then you know if you say *I love you* and the gans in the box moves, it shows your emotion and the way that you lie to yourself. If it comes close it is *I need more*. So you test how your words and emotion and soul will reflect in the box. This box in time will be another entity of the universe. You cannot say *I am a man of the peace and in the back of your mind you are thinking how you are going to kill this guy because he will taste good* because the box will show you. Start teaching the next level.

12114 K: From now on in workshops that you teach, bring the box of truth in front of you. Give them different ganses and let them make different ganses because they carry their emotion. Let them see how close they are between their physicality and their emotion and the connection to their souls. Don't make it a magic box and don't make it a voodoo box where you ask for the box to do things. The box is actually showing the truth of what you feel and which you don't want to confirm to yourself. So it is not a stranger, it is you showing the reality of how well you are connected to your soul and your emotion.

12203 K: [The journey of the man into space is going to be horrendous because man will learn that he cannot hide anything.](#) We will be as naked as the light itself and that is why we will shine. We have to understand the reality of the existence, we have to understand the reality of the existence of ourselves, our own souls, and nobody else's, because in space if you are the last man standing it is your soul that makes the path for you into salvation and nobody else. The salvation of the peace that I am prepared to give the rest of what I don't have and I don't need to the universal dimension so that it can be used by somebody

somewhere else in another dimension—the ultimate truth about the world of existence.

12323 K: I came from what I become of. I created man in the image of myself as myself is the image of the creator. In truth they are all one. Those who are wise understand and those who have the physicality find this far-fetched in the realms of understanding. The teaching of the spaceship institute from now on brings man to judge himself and nobody else. It is you who have to stand the time in space. If you go back to the teachings some time ago I said that there are those who will walk up to the space ship and not enter because there is no border control except the soul of the man who knows he carries the wrong intention. And he cannot fool his own soul. As you remember I said many times *there shall be no place for the world leaders as their hands are dirty with too much suffering of the others.*

12453 K: they will not enter. The prison becomes the earth that they do not see the pleasure of the universe. The hell for man will be the village of earth where he is forbidden to see the beauty of what the creator has created for man to see. That is the point of suffering. You always thought there would be heaven and hell. Hell will be man knowing that he does not have access to the beauty and pleasures that others have access to. Welcome to the truth of the universe and welcome to the reality of what is to come in the coming times. Welcome to understanding your own existence and you comprehending further in how much is to be learned and how little we knew when we thought we knew everything. We called ourselves (unknown word) in Arabic, which means *the head of the created or the king of the kingdom.*

12616 K: [We thought we were the 'top dog' of creation when actually we are the bottom eaters of the totality.](#) So let's learn and let's change. Let's bring the phase in that we move on as individuals and with us we take the others in the development of the technology. We still have to deal with the physicality and the existence and in bringing the others who need to be and will be part of it. Those of you who teach have become the messengers of the message of peace. But, this time you don't carry the message of peace as the Bible, the Koran, the Torah or any other thing. You carry the message of peace in the boxes where you teach man the creation of the fields of the ganses that the man decides the interaction of his own would with his environment.

12720 K: in a way we are all teachers of one thing: peace, not only on this planet, but the creators and creation of peace across the universe. Not many

will pass the test as man has learned over time the greed of possessing more and thus it will be the noose around his neck and the limitation of his development of the understanding of the totality. Try to understand and to go into the next level of teaching. You have taught yourselves the matter state in plasma and in fields. Now it is time to see even without the gans how the fields respond to you. Do you see light in the vision of the horizon of your eyes without an eye where the light shall speak in the dimension and the strength of the soul? Without the ear you shall hear and without the eye you shall see.

12838 K: this was the position when Moses spoke about the fire. All the prophets speak about the light and in that instance they see the opening of the light of the knowledge of the universe and as they did not understand they called it God and the Creator. But, in fact, it is the essence of the creation of the universe. Enlightenment should have brought peace, but enlightenment when it translated its power, became greed and murder in the hand of Moses. We saw the following of the same in the hands of the Christians and the worst came with the Muslims. The knowledge became the Chinese Whisper because it changes its level from the level of the soul to the greed of the physicality of the man.

12940 K: in the time of Moses he carried the murders in his own hands. In the time of Christ the ones who became his followers tried to do it as priests, and then in the time of Mohammed when the greedy law to the level of the man killing man to confirm the existence of God. How low could we go? We have seen the same repetition of the work of Mohammed, bless his name, with the rulers of the Islamic world and in the past 30 to 40 years in the name of Mohammed. In time it is getting worse rather than getting better. We see the same with the Christians, Judaism, and the others. The only ones who have walked away and understood more because they looked at the enlightenment are the ones in the Far East because they walk in the path of the emotion of the soul and not the physicality of the greed of the man.

13102 K: now that you have made the ganses try to make combinations of the ganses. Test your own emotion because you are the judge of yourself; nobody else is. You all have these tiny mobile cameras on your phone. Record it next to your eyes. See what you see in your eyes and see what the reality is that the camera records. Do not force it; feed it. And then you will see that the education has started and it is you who has to educate yourself. Try to work with the dimension of no matter states but the fields and then you break through. Those of you who are happy to stay teaching gans, making motors and everything else, this is the level where you have to work. In time your

teaching will inspire someone. Those who take the steps to understanding more will come to be the spaceship makers. Those who go through the steps become the passengers of the universe.

13216 K: there are many passengers on this planet, but not the whole of mankind. Try not to exert your wish, your knowledge, your emotion and your soul's power. But be the recipient so that in receiving what is needed is given. Never take, but accept what is given and because of that you shall give more than you receive. Try to understand the totality and the reality of the essence of the creation and now you have a 'sandbox'. You have all your gans boxes so start testing. Put it in the core and see with your emotion if you can create motion in the core without the motor. You have seen that with the Jon's (Arizona KF) test we showed last week. You saw that 2 or 3 years ago when the decision was made that the physicality and the dimension of the emotion could stop the reactor #2 in Descansano.

13346 K: Now make that stopping of the reactor, the stopping of man in the physical dimension so he can work through the energies of it, through the soul of the universe. Then you will walk through. Try to practice from now on, not making gans boxes or gans materials, but the interaction of the fields of the gans boxes you made with your own emotion. You will find the truth about yourself and many of you will not like to see what you see. You think you felt good but in fact what you wished was opposite and the soul was aware of the reality. *I just wanted to know if I could make that wish because I thought of it. I can show it but in the universe there are no masks and no cover-ups.* Try to understand your own emotion and your own existence so that you don't need eyes to see; you will see 'through.'

[From now on the race is on for man to know his own soul and the connection of his own soul with his own emotion and physicality](#)

13503 K: try to test yourself. From now on the race is on for man to know his own soul and the connection of his own soul with his own emotion and physicality and how he wants to show that physicality. Many of you who wish to be black will become black. Many of you who wish to be white overnight will change your color to white. And then you see if the heart is black or it's still white even though the color of the skin has changed. The emotion of the man is not in the heart of the man but is in the soul of the man and you shall see.

13554 K: you become the chameleon of the universe because the condition of the environment dictates for you to be to survive so that you don't give too much so that you have no more to give and you endanger your own existence and you don't take too much so that you endanger others. Balance is the order of the universe. You made the boxes and now these boxes of ganses you made is the box of the judgment of the level of understanding of your own emotion and your soul. And then make boxes of others and see if you are correct in your conduct. Then make boxes in the understanding of the insight of the man, because now when you look at the emotion the box cannot be made of those materials and fields that are in the soul level.

13650 K: you have to make a new box with the emotion level of the man with the zinc and copper. Play with it and in the other one there is iodine and something else. And then you play only with the physicality of the man where its nothing but the matter state of this planet's ganses. And then you see how you attract. Start playing the piano and see what key you have to press for what you want to get. Welcome to the first lessons of joining the universal community. You cannot sit in the drivers' seat until you learn which is the ignition key and what ignites it. Which one is the clutch and which one is the brake? What happens if you press the wrong one and the engine collapses and you get pulled to the other side?

13749 K: The steering wheel is the emotion of the man and you see how you steer the whole thing together. Start making as many boxes and sit in the middle of them. See and record what emotion and what time created what. Then try to fine tune and fine tune some more so that you end up with one box and in that box you become the true light of yourself. Then you are ready to become passengers of the universe. You just thought you had graduated in making nano coating and gans and now you find out you are back in the school of holding your pen just to learn the alphabet of the universe. Any Questions?

13858 Rick: thank you Mr. Keshe. Dirk has a question of some sort. I'll remind people to keep the questions relevant to the talk today. Dirk – do you want to ask a question? You have a bad connection. Try to fix your microphone, or write the question on the chat.

[Azar asks a question about interaction with Gans](#)

14258 Azar: good morning.

K: She seems to have the same problem with the microphone!

R: Well she usually starts weak and then comes on strong, so we'll see how she goes

K: This is typical Persian woman, lol!

A: I can ask a question? In terms of the ganses of the salt, I have made ganses of all the salts, calcium, potassium, magnesium, nitrogen so each of them should give me a different emotion when I interact with them I gather from what you were talking about?

K: it depends how you made them and what you made them with.

Azar: I make them the same way I made the CO<sub>2</sub> and Zinc gans with the nano coated copper.

K: now sit in front of it and see which emotion moves what.

Azar: OK because I have them all together and I made patches of them as well. Also I made the Cup of Life—I put the water in between the two layers of the cup and I measured the strength. Each of them had different strengths.

Calcium and potassium had higher strengths than the other ones.

14500 K: you have to test and you will see what emotion. Don't mix the ganses together and try to keep them separate and not near each other. You start understanding; perhaps it is not the 1<sup>st</sup> one, the 10<sup>th</sup> one or the 100<sup>th</sup> one. If it is not in the right strength it does not necessarily mean that you have found it. But when you find the first one then you know what you are looking for.

### [Vernie tells how to mix and interact with different Ganses](#)

Azar: can I drink them?

K: as long as you don't drink the gans itself, yes you can. Water gans is no problem. Let me explain a couple of things. When you make plasma water or plasmatic gans you carry the energy and you don't carry the matter state. When we had Vernie explain this yesterday (in the medical teaching) he explained it beautifully. Do you see Vernie; he can explain how to use ganses, the order to use ganses and even how you mix them together as well as how you want to mix them to get an outcome? Please explain as you did yesterday; this is important and many people never understand it. If you understand how it interacts then you can understand how to mix ganses together and use them to measure your soul or your sight or whatever.

14658 Vernie: when I make the plasma water of different strength it is best to add first the lightest strength, then add the next lightest strength and last should be the heaviest strength. This is done to have the consistency in the flow from

heavier to lighter strength and we have to be consistent in this flow so that we do not create an opposing flow in a different manner. The effect of doing this on the water or even on the body is much better than doing it the other way. So, I observed this and even tasted the drinking water with the addition of CH<sub>3</sub> and CO<sub>2</sub> and the taste is different when done this way than just mixing the two together without going lighter to heavier. I have observed the effect also that it is much better to use the method of the lightest, the less lighter and the heavier one as the last one of the combination of the gans.

14844 K: thank you Vernie. What he is trying to explain is that how you mix the gans dictates the elevation and the position in the plasma strength. It is better if you are mixing ganses to build from the base up. Those gans with the plasmatic atomic mass strength of the lowest you put in first so you cover the base from outside and you fulfill the full requirement of what is needed at the point of interaction. Then you add CH<sub>3</sub> which is 15. Then if you want add CH<sub>4</sub> it is the second one. If you want to add CO<sub>2</sub> that is the third one. If you want to add amino acid it is the fourth one.

14941 K: If you don't do that process even if you are taking mixture of ganses for different applications or reasons, you always start with the lightest first and you give it space and then take the next one. This is how it should be done. If you mix the first one with the fourth one you get a totally different energy transfer and even when you put the second one in third. It is important for us to watch very much the way step by step you follow to get a perfect gans and how to mix the gans to get the perfect condition that you want.

15024 K: the beauty with a lot of work you do, especially if you are looking to understand the work of the gans with the physical dimension need of the man, you always have to add two things to it. One is the amino acid and the second is the hemoglobin. Then the condition will be of those that are in reality at the strength of the plasma of the body of the man. If you just put amino acid and put magnesium you will get with it what is to be a plant. You don't want to be there. You dictate with the presence of the materials and the ganses the conditions you want to create to be connected to man, to you, to a dog, to a tree, or to a stone.

15129 K: learn the process of interaction of the fields and not the physicality of the arrangement of the matter. When you put liquid gans of the CH<sub>3</sub> in the water and the liquid gans of CuO and CO<sub>2</sub> in the water it is still the same water. They are all so transparent. And this is one of the problems we have in measuring what is what and what it does. This is important for us because in

this knowledge we have to understand to be blind to the world of physicality because this is what we have decided to do and what, how and the way we wanted it. Would this be in the condition that we want? Do we want to add in so many ways how, where and the way we want to do it?

15307 K: Would it be better to put the heaviest first and go from the heavy to the light? If you go from the heavy to the light then you create the condition of existence of the plasma. The heavier, stronger fields will overpower and dominate the weaker. But, where the other one is vice versa. You already stand out in the condition of where you want it, the way you want it and how you want it to change. It is important for us to be and to have a full understanding of our own existence through our own work. When you put different strength plasma fields they all look the same. When we show the pictures of the products that are to be marketed in the coming time you will understand this very quickly and clearly that it all looks transparent as water. The new products coming out of KF Ghana clearly explain that this is a dilemma for the world of science.

15445 K: this is what is driving people crazy in the world of science. It is water; I feel it, I drink it in a certain sequence and I don't have high blood pressure and I eat it in a different sequence and I lose the diabetes. I use it in a different way and I get rid of typhoid. Using it in another way and I walk away from cancer, but it is still water. When we release these pictures you will see; it is amazing thewe have created in the world of commerce and science. Those who want to understand it are more confused than anybody else.

15542 K: it is the way we should understand how and what we want. In a way if you make a bathtub and go inside it, if you make a glass box would you disappear physically not to be seen because the plasmatic magnetic fields of you and the environment created are both the same? We shall show this in Accra very soon. It is what you call the hidden energy of the plasma. It is very hard for a lot to understand but there is no difference in structure but in the energy carrying it does. Now try to make a water that carries the energy of your soul and carry it in your hand; God help you. Make a water gans that carries the emotion of the happiness of your soul and your emotion and carry it in your pocket. Wherever you walk you are always so happy because it is so powerful it overrides anything else in you. Then as the happy chap you are feeding the others who see you are so happy. I hope their happiness is not theirs for the anger point.

15724 K: the time of play and enjoying life with the plasma technology has just started. If I tell you the things you can do with it you will go crazy and mad with it! There is so much to do and as Alekz says, *I don't want anything else to do. I eat, breathe, and sleep plasma technology.* When it touches your soul you get the pleasure of understanding it, it changes your life. It depends if you manage to make the strength that gives you the satisfaction of existence and then that is like falling in love. When you have touched it you cannot let go. The freedom from it is beyond the understanding of the physicality.

### [Uanus from Greece asks about the mass of mixed ganses](#)

15907 Uanus from Greece: my first question is if we add two ganses together, for example CH<sub>3</sub> with the atomic mass of 15 and CO<sub>2</sub> which is the atomic mass of 44 is the result a new field that is 59? Is it simple addition?

K: No, but you have to learn how much of each you have put in. Is it a gram of one and two grams of the other?

Uanus: okay.

K: you have to learn that the mass ratio is important because there is more of one that gives that dominates the strength. It is like the medical application we double the mass of the energy of the back (health pad) to that of the front (health pad). This transfers the energy to the front and it is a directional and magnetical energy. But in gravitational it is the reverse where the highest (energy) goes to the lowest (energy).

20009 K: when you put the higher order strength of the plasma with the lower order strength in the plasma you receive the higher order gravitational magnetic fields from the strongest to the weakest. But when you release the fields from the weakest its own gravitational is weaker so the stronger from the other side can pull it to itself. So if you look at it the fields from the north pole of the weakest is gravitationally weaker than the gravitational fields of the strongest of the south pole of the stronger. It allows it to pull it to itself. Otherwise it will be feeding back. And it is the same on the magnetical side.

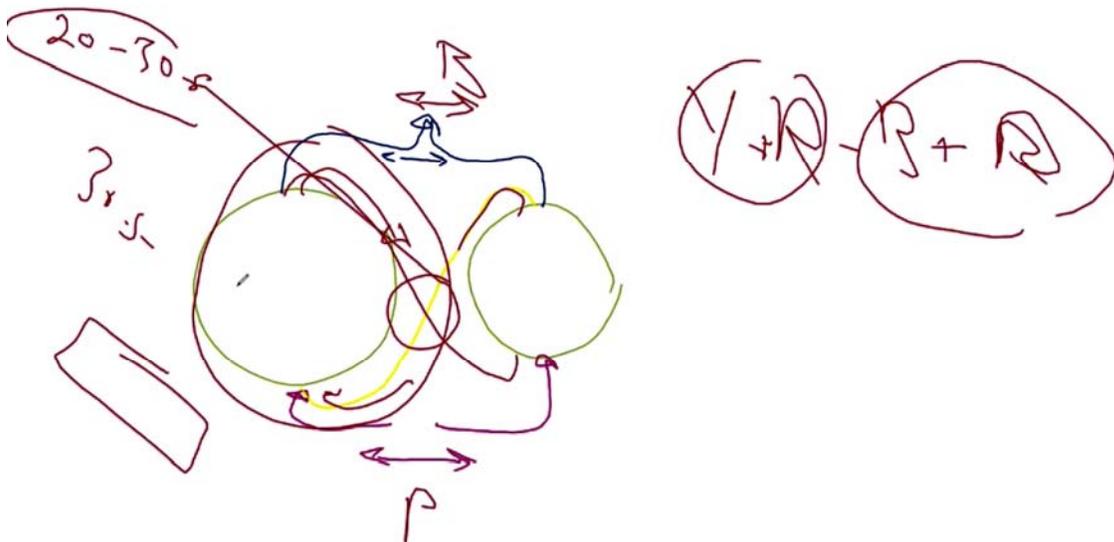

20108 K: You have to understand that the fields carry both magnetical and gravitational. It is not one way. At the same time your magnetical pole similarities repel each other so it needs to the part of the field flow to go to separation. And, the same is from your south pole. You have two fields—one on the top and one on the bottom and they interact. And then you have two fields of which the top of one attracts with the lower of the other and from the top of the other one to the lower of the other one. This has to be taken into

consideration and that is why when we speak of the field strength of the plasma we deduct the two repulsions to give the total mass of the gravitational mass balance.

[MK explains magnetical and gravitational interaction on the white board](#)

20202 K: let me explain to you on the board so you understand. Can I share please? This is what we have been teaching. (draws a larger ball and a smaller ball). You have a plasma and you have four field forces: North Pole on each which gives the repulsion. You have South Pole on each in the way that again creates repulsion. Then you have the magnetical north pole to the south pole and then you have another one which is from the top of the 'ball' on the left' to the bottom of the 'ball' on the right and the bottom of the ball on the left to the top of the ball on the right (forming the 'infinity loop' between the two). (2.03.19 minutes).

K: we always say the balance is about 20 to 30% and sometimes up to 50%. When the balance in the center (of the infinity loop) is the deduction of the yellow (from the top of the small ball on the right to the bottom of the larger ball on the left) and the red and the blue and the magenta. This is the balance you get (Y + R) (R + M). The two on the left ball are the releasing and the two on the smaller ball are the absorption. They are interacting to receive. These are the 4 field forces that we always have to consider. When you take away B (blue across the top of the two circles) and peel away from it gives you total mass exclusion by 30% to 50%. This gives you atomic mass of the plasma.

20425 K: You never consider plasma on its own. You consider plasma in respect to its interaction with the other plasmas in the environment. Plasma on its own does not exist. The more you have the heavier elements of the plasma the more you lose here (at the top of the two balls where they are joined by the blue) in the balance field of 20% and then the lighter you become as with hydrogen, it can go up to 50% reduction. The extraction of the fields in the balance equal level is too much so you lose a lot to keep the balance. If you get ring magnets and play with them you will understand very quickly.

20516 K: so you cannot say that you balance it with what created it. You have to consider every aspect of the interaction. So it is not that you add one glass of water to another that you are at the atomic level of the two added together. I hope I am clear.

20538 U: Thank you for your answer. So, is the first part the magnetical and the second part the gravitational?

20548 K: yes; you have 2 magneticals and you have 2 gravitationals. The magneticals are the north poles repelling each other and the south poles repelling each other. The gravitational is the interaction of the north pole of the first that goes to the south of the other—the bigger one to the smaller one. When you have hydrogen it is about 2 of the same, which is a 50% reduction. In a way when you consider the hydrogen environment you don't consider it as one you consider it is half. But when you go on the other hand you go to high atomic mass because you have two neutrons that are giving out so the fields coming out are much stronger than the balance. And sometimes you go up to 30%. But half of one is not much, but when you are 203% to 230% it is a lot.

20655 K: When you look at atomic hydrogen, with one you lose half. But when you look at 200 at 20% that is 40 and that is a huge amount. In all the interaction depending on the environment if you don't get a 40 you have some around 39, some are at 35 and some are at zero. This means the balance is equal to the balance of the structure. When you do the test of the ganges of zinc and near zinc, always consider the presence of B12 in iron with the existence of the amino acid. It is not the zinc emotion on its own that is there, it depends how much the cobalt has changed or the cesium amount of the cobalt radiation exists near the iron so that it gives you the different strength of the gamma rays. Some of the gamma rays of the cesium play at the same strength as the cobalt, but not all of them.

20808 K: And then that affects the ratio of the energy that is released in the interaction of the zinc and copper in the same container. Then you decide how much you feel, if you feel good or you feel bad and how you want to control the atomic mass. It is not a simple game. The universe has many games in this state.

### [A question about the different bodies of the man](#)

20835 U: yes it does. Another question please. So this one has to do with the man and there are different bodies of the man. If the physicality of the man is plasma, are the emotion of the man a different plasma and the mentality of the man still a different plasma?

20902 K: in the strength it could be the same entity. The soul of the man is much stronger and the emotion of the man is a level down because it changes and it reduces to become the emotion. And then the emotion that reduces in terms of the physicality. In a way if you look at it you can have the spectrum of the same thing. But, if the gap is big enough you can have the soul, the emotion and the physicality within the structure of one element.

20948 U: so they are all parts of one bigger plasma but they are not exactly the same, correct?

K: No they are not the same strength; because one in introducing the strength becomes the other weaker strength.

U: thank you.

21012 Azar: who is the one who talks then?

K: ask yourself. We have changed in the physicality of the existence. We have converted some of our emotion into the vibration of what you call the sound. The dumb do not speak but they understand all the emotions. They do not need the voice to speak. Nor does the deaf need to hear but he understands the emotion and feeling of the laughter and the joy. It is we who have translated it to be able to be comfortable in understanding which one is speaking. I call it laziness.

21102 Azar: when I talk do I filter?

K: yes you filter your emotions to a sound level. That way you can explain it to those who do not see your soul and your emotion.

Azar: so is it kind of hiding my true identity?

K: no, because of the pieces we have created it is a way to be able to be like the others that so that we don't stand out as dumber than them. (quotes a Persian proverb) *If you don't want to stand out, become like the rest.*

Azar: sometimes the way I feel about my body is that I just want to get out of this and I don't know how to do it.

K: it is very, very easy. I do this frequently and as I have said many times I am ashamed to be in the body of the man, but the body of the man is the only way I can serve mankind to get out of this trap.

Azar: thank you Mr. Keshe.

### [Pavel from UK asks about creating Gans with the human body as the container](#)

21220 Pavel from UK: I have 2 questions.

K: How are you these days?

P: Very good. The first question is on the creating of the ganses. If we consider the human body as a container of the different ganses and different strengths....

K: you don't need to consider it; it is! (a container of different ganses and different strengths).

P: yes, of course it is. So in this case when we start playing with emotions, is our physicality recognizing certain phenomena in certain parts of our body, when we 'play these games'. Is this pretty much the same for all humans? Can we create a pattern of progress and understanding?

21344 K: let me tell you something and maybe what we can do is expand on what you have said in a very short way. The scientists nowadays put electrodes on the brain and say this part is your emotions; this part is your arm and the rest of it. Why do we go through the physicality and not go directly to the brain instead of the physicality? And then see how the physicality responds in respect to the emotion of the feeling in that part of the brain? Why don't we bypass the physicality and go directly to the brain? I know this sits in this part of my emotion and I want my emotion to be happy. That happy part is that box because when I feel happy and when I remember the joy of someone I love that box with ZnO and Ca moves; so that is the 'box of love.' And then see if you put that box of love trying to come to the physicality does it come out like a kiss or a cuddle? Then you find out which way is how you want to feel the physical emotion or do you want to feel the direct energy transfer? You have got a lot to learn.

21506 P: so that means that there are some sensations in the physicality and which one occurs on different people pretty much the same way....

K: not really. Near enough maybe.

P: can we just understand this as an indication of what is going on and how we understand it?

K: that is the purpose of the teaching from now on and that is for man to understand his own control of his emotions without the physicality. And then through it to see the soul and then you see the opening to the universal condition. The spaceship is the body of the man and the ship is to be able to carry his emotion wherever he wants to. You always look for the ship to carry something in it. We look at this the wrong way and we use the physicality to get to the emotion.

21632 P: thank you Mr. Keshe. The second question is related to our creating a 'plasma bank' and we are doing this for our emotions for the different entities. I mean people, like human beings. Are we able to exchange different things we name like wisdom, intelligence....

21702 K: of course, you will be amazed how you can speak new languages that you have never spoken.

P: that is what I'm waiting for.

K: it is very easy. They say some people learn languages very easily and if you look in the background you will find out the emotion they put into it is what allows that level of learning. All you tap into is the soul.

21734 P: that means if we expose the fields using our emotions using, using our interface with this environment which are our bodies, can we observe some kind of phenomena with other people who think they want to receive.

K: you feel them before they talk and you feel them before you see. You understand emotion. They teach this somewhat in martial arts where the man does not go beyond the expansion of it. But he can increase it. When you go into deep space and try to look at the lights there is so much that you don't see. On the other hand you can extend and see beyond the boundaries of the spaceship you created, the vision of the man will come through his soul. In a way if you look at this you shall become the center of the universe as you shall see the boundary of the field strength of your own soul. One day man will understand.

P: thank you very much, Mr. Keshe.

[A question about the Djinn](#)

21846 Rick: here is a question from Trevor in the live stream.

He says: could you please ask Mr. Keshe about the jinn (djinn, genies), which are plasma beings. Are they controlling mankind? In the Quran it says that they were here on earth before mankind.

21913 K: mankind came out of the condition that was created physically which led to his existence. But the life has been here by the others who do not depend on the condition of the atmosphere of this planet for them to exist. It is very much that when man understands the work of the universe man will understand that space is full of nomads. They do not have to wait for something to be created. They come, they visit, they see, they feel and they go. As I said many times, when you open the video of the life of man on this planet, man will be ashamed of what he has done.

22006 K: One of the things that has been undisclosed, and I will go back to this some time, we will show the true behavior of Moses because he made a huge problem. And then we will see how many would like to be called a Jew. I have seen it and I am ashamed to be part of humanity.

22046 Rick: Dani has a question: can 'lost' souls still be elevated?

K: you never 'lose' souls.' No soul is ever lost.

Rick: maybe 'wandering souls?'

K: No you exist in your condition; there is nowhere to be 'lost.' You live in the condition that you have chosen to be in. It is like a fish in a fish tank that has a 5 second memory and he doesn't remember that he was there before, so he can exist in a tank. It is the easiest way to forget and in a way it is imprisonment in the physical entrapment. Man's soul or any soul never gets lost. It's just the condition it accepts to exist in.

### [Jacky presents a French teaching workshop](#)

22152 K: do you have something to show from the Swiss teaching last weekend?

Rick: I think Jacky does actually.

K: we are trying to promote teaching because the time has come for mass teaching. Do not be afraid of teaching because those who object just don't understand. Give from your soul and they will be enlightened.

22245 Jacky: I have made a little presentation of what we have done. It was the first conference for the French speaking under Keshe Foundation education

path. It was on Friday through Sunday near Lyon in France. We had the program with 18 hours of teaching and then we go through what we were giving in the teaching. The people were sleeping and eating at the workshop location. Everybody stayed there; we first started building a team to making organization. The French people were beautiful souls and they organized everything—the room, the coordination, everything.

22408 Jacky: we chose to drop the price and we tried to keep it very low and we found a really nice place that was like a school which they rent out on the weekends as nobody is there. The facility was very nice. It was very secure as the hall was closed and no one could be there but us. It was a place for 100 people and we had 85 people. It didn't take too much material. There was a lot of teaching and the sound was very good. But otherwise we had the strict minimum. We had a few things such as magnets that people could play with to feel the fields. We had people from KF who had pain pens and Magrav there to sell. We see the difference of the magnets in space and not on the flat manner so the people feel the feeling in space and not just flat matter.

Jacky: there was some gans and nano coating so people could feel those things. Then it was really nice and if you see, the room wasn't fancy but it was 10 Euros per person so it was quite wonderful. Then the food was the same and was low priced and very nice. This place was really a good choice. Then there are different pictures of the different teachings and the community of 83 people who were there. So, if we go through the process we start with the presentation of One Planet, One Nation and then something about Mr. Keshe followed by

the promotional video from KFSSI. Then we started with the magnetic fields and what is plasma. Then you have some tips after the videos:

*Magnetic fields: A lot of you know and have played with magnets. Magnets and the magnetic fields are the backbone of the creation. Nothing in the world is, and can exist, without magnetic fields. But, all the magnetic fields in the universe don't have the shape of very much what you get on your fridges; these are the magnets you see in your fridges, the little magnets.*

*Plasma: So if you look, you already have, lived and played with magnets. These are little magnets you stick on your fridge, on your door. But, behind these, sits the whole mystery of the creation. If you go to every single smaller piece, they are actually very much like this. They are little, little spheres, but in the universe spheres don't sit on the floor, the spheres sit upright, and these spheres of magnetic fields, when they sit upright, they look very funny; they look like a little ball, which they rotate. And this, in our language, in the bigger language, we call a "Plasma."*

Jacky: then you go to the next step. When you understand what magnetic fields and plasma are, then you will understand gravity and repulsion. So magnetical and gravitational we have a lot of examples and stories about. Then when you understand this people start understanding the difference between elements, atoms, molecules and cells.

**Tableau périodique des éléments**

- Element
- Atom
- Molecule
- Cell

Les masses atomiques entre parenthèses sont celles de l'isotope le plus stable ou le plus commun.

Michael Dwyer

2:27:34

(2.27.37 picture of periodic table). And at that point we now understand the plasma, the magnetic and the gravitational so we can make the difference between plasma, physics, chemistry, and biology. WE go in depth of this.

22800 Jacky: then we understand that this is a science and with this plasma science you have to have an ethos because it is a lot of power. So we go through this subject and as we understand the plasma we understand the fields to create the condition that we dictate. Everything is created from there. When you understand that we go into nano structure—what is it, what examples of the structure and then some examples. We understand people are the plasma so they start creating nano layers between them and the fields interact.

22850 Jacky: At that point we go to the field interaction because you understand that the plasmas interact between each other and create new matter dictated by the condition that you decided. And, at that point you are ready to understand that we come from matter and we go to the nano to the gans to the free plasma. So everytime in the teaching we give examples and stories. Then to go outside the matter state you need to have no connection with the matter so you need to understand the secret of perfect nano-coating so you have no more connection with the matter state.

22940 Jacky: we end up with the history and how we can write the next phase of history. Perhaps it is time for planet earth to take the next step and at that point we try to make the people who want to make the same conference to do that. We choose some easy parts of the video so everyone can make it easily.

23020 Jacky: here are some testimonials:

*Great weekend, Very good organization. Very good teaching. Super, super, super.*

*Thank you for these moments of sharing. Sympathy, generosity, goodwill, perfect organization.*

*Thank you all, wonderful. I appreciated the simplicity, your big heart, the organization, the organizers, the tariff, Jacky and his clear explanations, the beauty of each person's heart, sharing.*

23044 Jacky: this is some of the testimonials. It was so beautiful; I see a lot of building workshops with people showing the light with the Magrav systems.

## 85 REACTORS

This is our light, showing the 85 reactors built during the weekend. I think the French people understand that they are the true reactors and what infinite possibilities they have. They start building with huge collaboration and field interaction with this plasma. And at that point this is important that people understand that 80% was paid. The price of 200 euros times 80 with everything was the price. The cost was 120 euros and there you have the difference. We give 6,933 euros to the KF. With people organizing this we understand that we receive so much from the KF that we don't want any money just paid for our room and everything. We took some money for the room and the fuel and the rest went to the KF. People gave money for the KF and we collected 1000 euros more so we gave 7000 to the KF.

It was beautiful. I didn't do anything as the people believed in this project and got everything organized. Everything was so perfect. Then I just came in started explaining and building the plasma. It was really beautiful. At that point the power point in the future is available for people who want this. You have all the videos from Friday night and Saturday morning and the rest. I'll show one and I have translated this in English.

33413 Rick: turn the music off please. We can't have background music like that Jacky unless it is Okayed. Is it non-copyright video? Jacky: it is the music from the introduction KF video. So there is the 18 hours of teaching that is fully transparent and we show all the teaching and the repetition. In the future it is a good way to work with total cooperation and transparency. Everybody

was happy because we sent the money to the KF. We received so much and people were really happy with the weekend. I think this is the future of plasma technology. I want to thank Mr. Keshe for all he is doing for us. Thank you very much.

23605 K: thank you very much Jacky for your hard work and everything you are doing. This is the path we go now and the teaching has to become the cornerstone of the new technology and the new understanding. Luckily, this time around much of the human race have been educated so they can understand and hopefully we don't leave anyone behind, so nobody can be abused by those who think they know a little bit more. Use these teachings to not only teach nano and gans teaching but so the man understands how to elevate his soul and his emotion so that this can become part of his existence. The course of the teaching has to take this into account; this is a major part of it.

23700 K: the donations will go for what we have set up with the target of 250,000,000 to build the full center. It can go higher now that we are looking at more details. One way or the other it will come together. We see talk from certain governmental organizations to donate as they cannot do this themselves in one go with the space technology. We will become part of it and see donations from the governmental organizations that they are part of this. It allows the One Nation for the space technology. We have been approached by a handful of governments who would like to participate. The same are donating and having their scientists be part of this development as they cannot do this on their own. And this is the beginning of it and we will see changes that will come and we will be open and transparent.

[We started from Africa as a human race, and maybe Africa is the place where we go to space as well.](#)

23800 K: just as Jacky was talking I received contractual letters for the conference and the start of the project. It will be signed today and we start the procedure of building the site for humanity. We started from Africa as a human race, and maybe Africa is the place where we go to space as well. I hope this journey of a few million years has taught us a lot to change our behavior and attitudes. Thank you very much for your presentation, Jacky. If you are doing other teachings please bring them forward so we can add to the teachings.

23845 K: from now on try to concentrate on your teachings on how people can see the benefit in changing their own emotion and soul's understanding to bring them comfort and pleasure. The KFSSI center in Ghana will be the center point for humanity. In so many ways we start calling on most of the scientists of KF to converge to Ghana to start the teaching center. We have already called it the gans valley, and you have seen the buildings that are provided for us and the land that has been given to us. Now we see governmental institutions and other governments want to be part of it. Initially it is we who started it and very soon you will see the influence and prestige will bring governments wanting to be a major part of it. We will announce this in the coming time of how the governments, military, and different dimensions of security are coming in because they see and know that they need to be part of it and they can at least have an understanding of what is to come. There is no fear; it is a joy.

24017 K: We have been talking to the military for a long time and they are coming to understand now that maybe the times have changed. We have to use the energy in a positive way and in so many ways you shall see. We can show you the range of organizations that we are communicating and walking with. It was very interesting and amazing at how people are doing good for us. Yesterday when I heard that press heard and understood what was going on, they stood for the foundation. When this 'sir' calls the press repeatedly here, they tell him that they see the KF has done good for this nation so 'just get lost.'

24119 K: this has caused a lot of government organizations to ask why so much information is coming from this guy and these people. When they see where we sit and they call references they say they want to be part of what we are doing. They were not fully informed and now they are fully informed and want to be part of it. The enemies of us sometimes serve us better than ourselves. This is fantastic; he came to destroy the foundation. Now he is serving it by destroying himself. But, we have to concentrate on the positive ways. I have just been told by the security people on another site, the confirmation of his theft has been released. I would like to know how you can just walk away with \$265,000 of the knights funds. The emails have been released.

24224 K: another surprise is that I have just been told by securities that the Panama documents of accounts used by DL for terrorism are to be released in a short time. You can see that we don't talk. The Panama Accounts are referred to in a lot of documents and now we show the accounts. They thought they can go before the nations and tell likes. Now it is on the table and governments are

after it and they want to know how much has been stolen. It goes back 27 to 30 years and it has become a habit. They thought they had the right to steal from the man and take his life by poisoning him.

24305 K: you have to understand the development of the technology is part of man understanding himself. We teach, so please teach. Those who are happy with the power (Magrav units) let them stay with the power. In have electricity bills paid they have more time to enlighten themselves. The more pain and pressure we take off people in the public with the delivery of the technology, the more they have time to look to see if this will help them and they want to show. We have an example without us knowing.

24348 K: a few months ago a man from Ghana was in the United States to save his life with blood pressure of 220+, and they couldn't do anything for him. His family works in atomic technology and they told him to come back because the technology is in Atomic and they can help you. The man is a priest, if we can call him that. They flew him back to Ghana because the blood pressure was still going up. Then Benjamin helped through the gans technology and the blood pressure just dropped. Now he has no high blood pressure and he is such a happy man. In his position of a priest and as a man they trust has contacts in very powerful places. He just goes out and they all knew he was dying from the high blood pressure.

24455 K: This is an example and people who have problems now come with him. They sit and talk and talk and it has just gone wild that the technology is in Africa. We don't need to pay these high prices for blood pressure tablets and whatever. It has become a joy to serve humanity in Ghana and then we transfer the knowledge. Now we go to a minister whose family has been touched by the technology, not by the energy, but by the health that no one could help with all the latest medicine. We are going crazy in the way the technology has spread.

24544 K: We have done the work and now it has moved into the level of government of the senior politicians and world politicians. Whatever they are with a disease they have a problem when it cannot be solved. And when they come to us we serve unconditionally and now we see it. Now the discussions run at the ministerial and the presidential levels that if there is problem with high blood pressure or cancer they just say they will call KFGhana and go over there. And it is like delivering water.

24627 K: we go into the highest registration for the medical application to all the standards boards and in a board meeting of 10 to 15 they don't want to

know more because they have already seen their secretaries and everybody else benefit and now what is the next step. Can we have this and they call and say the order has increased, can we bring more? And then it is the management of the people who run the country. Now it has gone beyond the borders of Ghana. This is how we serve with the teaching of Jacky and others and the work of the KF supporters around the world.

24704 K: the work is there. They say KF in Ghana and we can say no it is in the Philippines and China. They can see it can move to the level that it is coming from both sides. We are paying off for our hard work. When I walk outside in Ghana in past few weeks with other people from different governmental organizations who are working with KF, I just say to Benjamin that it looks like the key to heaven has just opened up for the foundation.

24748 K: But we have to keep on teaching the 7 billion. We have shown the nano technology and now we have to show the ethos of space as I start teaching slowly, slowly since the New Year. The governments who opposed us are now inviting us but they want to know what they can make for their nations. Last year we began to see it and now we see more of it. Now the inquiries are coming from governmental level that they don't have answers for this and we have shown it and can we expand on it.

24828 K: One structure for a million farmers in Europe has asked for help because otherwise they cannot sell their products because of the contamination. That is 1.4 million farmers and I am working on it. In the next few weeks we release it back and we do everything through the Italian government. We release it to the nation that we resided in and we worked with the Italians but the products will be produced in Ghana and exported from Africa into Europe. The first contracts are signed and everything is in motion because nobody had a solution. Now governments see us as the solution. The people, who go and write all the rubbish, let them write! They are bringing more and more people in.

24926 K: when you look at the way we work it has paid off. Our way of exchanging technology knowledge and energy for peace has touched a cord with the world leaders and with humanity. That is where we have to go. We have no choice. Man has tried everything—invading, forcing, and building walls and everything has fallen apart. Teach from now on the technology of the human level and the technology of the emotion and the soul of the man at the same time. Then you will see that you will touch the core of everyone. Everyone wants to be elevated so that they live a perfect, clean life. That is

where you are going to score, not with the nano or gans. You might help them with their physicality but when you touch the soul of the man you free the man.

25043 K: show them how. In the coming time we will sell units where people can measure their souls. They can measure the strength of their emotion and their communication with their physicality. This will all become part of you as the KF worldwide will put this in the public. We have no choice; we have come into the space technology. We went through 2 or 3 years of transition from one to another. Now we are in and all of you who have listened and understood have joined in it.

25127 K: you have to understand how and the way we are working. We teach in every level and we enlighten the man. The beauty of it is when you have people make the gans of zinc oxide in that process they are gradually enlightened and their emotion and souls are uplifted. That is how you see people who work with the KF work, especially with the zinc. Anyone you see that go in opposition never made anything; talk is cheap. We have to make the difference. It is our job now to educate man into the universal community. We are all ambassadors of it and we have been given the tools. This process will take a few weeks or a few months.

25231 K: Once a number of you start building these boxes and showing them and start asking somebody in Australia that you would like them because you feel connected to them to feel angry so you can see if the box shows their anger or their joy. You don't need to be in the position. The freedom of the soul of the man will come with the accessibility of the universe. We will have access to everything if you understand the secrets of motion in plasma condition. We don't preach, we teach and we enlighten.

25313 K: It is for you to understand the strength of the light and then you will take it to the expanse of the universe through the speed of the light of the universe not of the matter state that has the limitation to it according to Einstein. Work and upgrade your teaching. When you spend 3 days teaching, spend 1.5 days for man to understand how it attracts to this ball. You don't need to have a box. Make different gans with the transparent balls and let them interact with them and see how it rotates and does it rotate, does it have strength? But teach one thing and don't force it; let it come from the joy of the interaction.

[More details of the Space Centre development n Ghana and what is needed](#)

25436 Rick: there are minor questions. Do any of the panelists have questions for Mr. Keshe?

25456 K: I think the teaching of today if you understood it, is not showing the system but teaching the reality of ourselves and where we have to go. Please do look at the building of the spaceship institute as the priority and every effort will be made for it to be done so that we free the man. It is very interesting to see how we challenge the governments to be part of the bigger part. It has started; we have seen it. The military want to be in it, the governments want to be in it and strangely enough the condition to participate and be part of it is very simple. And the government has to sign themselves into the peace treaty. Let's see how many governments will join the spaceship and participate and develop it and by signing the peace treaty they commit their nation to peace.

25601 K: As we know the government of Ghana has already committed themselves to it and this was shown in January. So we are in the right place and those of you who listen to the teaching understand and whatever you do and teach, understand that the condition is very simple. It is for us and not for our neighbor, my wife, or your husband or whatever. It is for us to understand our own and then through that we will become passengers of the universe. Thank you for today.

25639 Rick: Thank you very much Mr Keshe, and I guess we'll remind people they can donate toward the Ghana spaceship institute through the website or pay through the Paypal of US KF.

25715 K: we have a target of 250,000,000 considering that the land has been donated to us by the government of Ghana. They have made the biggest contribution and this land donated to us is worth millions. It is donated for the work of KF and is in a prime site worth millions. They made the sacrifice for the nation as they saw this needed to go to the next phase. So we have received our first multimillion donation from the government of Ghana and we thank the government, the officials of the atomic commission for their relentless support so we can support where we are and their nation. Thank you.

Rick: there are other ways people can help or donate to the Ghana project other than money.

25817 K: Yes there are a lot of ways. We are moving into the science building we have shown until the site is built. And in the next 2 to 3 weeks Carolina and I will go to Italy for the conference. Then we will come back and the building project should have started by then. We need support of equipment,

spectroscopy, infrared spectroscopy, magnetic field detectors. These labs need to be equipped with the latest and Armen is putting a lot of effort in sending systems together so we can show the flight system.

25912 K: In the coming time you will see the full structure of the flight system that is being developed in the US with the field tests. We need a lot of public teachings on understanding the process of the flight. We need a lot of support in bringing governments in. Interaction between the governments and KF has to come very rapidly. In a way we had experience with this. When we started speaking and giving the US... remember 3 or 4 years ago, the government of Sierra Leone was the first government and the ambassador received the key. It snowballed to the Japan ambassador and then to the Italians, Chinese and the Russians. And we saw that because everybody else had it the Americans came and asked for it because everyone else had it.

30025 K: we released the email where they asked for it. That led to the peace between Iran and the United States and the 5+1. We have seen the path of knowledge for peace has paid off. We have to do the same now and we are releasing the knowledge of the information of the space technology to the African nations. Surely the Europeans and the Americans are not going to fall behind, nor are the Chinese. When you build we show the banners that are made for Ghana that say: *Fly into space from Accra*. When we showed this to the government the officials and people who come to see it cannot believe it.

30112 K: they say: *Africa? Ghanaians going into space?* When we explain the simplicity of the knowledge they say, *it's possible; why not? We are in it*. We don't go to fight and we don't make satellites to do this and that. We are teaching the knowledge freely and we show it can be done. It shows that when we started in Sierra Leone with the patents and keys. Now it starts in Ghana. Nations can participate as long as they come to peace. Our biggest problem is where are we going to expand in a few months? When we show Ghana as KF worldwide has a center, and all the KF supporters participated in its development and expansion, governments will want to be there because they don't want to be behind what they called a 3<sup>rd</sup> world nation and now it's leading in space technology and knowledge. .

30225 K: it works; we cross the borders through knowledge and with it governments will follow. We need to build a center and we have enough strength in numbers across the world to change it. We need to have those who write against us for the people to see our beauty. When they write that *he promised to go to space and nobody could do it*, they did so because they were

enemies and they killed our people and did whatever they could do to delay. So they say when we explain this to them *now that we are there we make sure that you have it*. The more they write the more they bring us up. The more they call the more support we receive.

30326 K: Strangely enough when the press people came to the factory yesterday because there was a big meeting at Atomic, they said they heard from this guy who lies about where he is. Then the reporter asked if he could have the water because he has high blood pressure. And they go and then come back with more because there are more in the press who are sick and need help. So, Voila! They can make as many calls as they like because now we know the truth. Let them oppose because these are the fertilizers of the development and the opening.

30315 K: the surety of the success is in serving humanity and we do that unconditionally. For us, for my family to stay here is totally opposite of what we are used to, but the price of peace for mankind after thousands of years is worth it. This is not suffering but the pleasure of serving humanity. We need things, we need everything. Ghana is very advanced, but we are bringing the most advanced technology into Ghana so we need to support it and bring dimensions into the understanding. We need to understand – we need furniture, we need everything. We will send you the pictures and you will see the beautiful lush land that was given to us.

30519 K: we walked on it with the architects a couple of days ago. They are cultivating on the land; it is fertile land and there are sugar canes on it. They are growing plantain, casaba and it is prime land worth millions. But the advancement of the nation, the government and the authorities is to give this land and the farmers say they will move another way—no problem. We have a beautiful small river crossing the land. It will be used to show the beauty of the nation.

30603 K: We will not destroy anything to build something to prove we can do something. We incorporate and collaborate. I have given thoughts to the architects. There are some huge mango trees and I said, *don't touch these trees. Place the buildings around them*. We try to bring everything possible in a normal way. We have to build to bring progress but we don't build just to be there because we 'are somebody.'

K: we are there to make change and we have given instructions that the buildings are to be one story only. We are collaborating and incorporating all

the knowledge of the KF in all the materials used in building. We collaborating the gans in the brick work in order to not use air conditioning. We are collaborating in bringing the gans materials that we know of to block the sun's rays so that the building stays cool. The power and energy units are the same. The power and purification units are inside so that we don't have to use power outside. Everything we have and we use all our knowledge to show the new environment and at the same time being able to go to space and being able to open space in an environment that is open to everyone.

30744 K: when I explain to the scientists how easily we can go to space without what I call the 7 years' of swimming pool training it touches their core and they understand it. So why have we gone this way? We had to go this way as that was part of gaining knowledge and now we understand more. We don't kick the bike because we have a jumbo jet. We still ride the bike when we need and we get on the plane when we need to go that way. Now we travel in a faster way into space. We need everything. You can donate. It is the right way to do this, we set up groups and organizations to control. ]

30829 K: We need furniture, everything you can imagine. Computers and lap tops are needed. But it cannot be what are 'leftovers' and pieces of what someone doesn't want. It has to fit into the structure of the work so that there is unison in the whole center and we can control it and we can have it so that it can be beneficial. Our priority at the moment especially on the research side is to understand the materials with the latest spectrography systems so we can quantify what kind of gans give what kind of field strength.

30907 K: if you work with \*\*\* spectroscopy it doesn't give you if it is a hydrogen. It will give a spectrum of 22 elements or 25 elements in infrared spectroscopy, so we can see which material creates which fields and which way can we use it and for what we can use it if we change something. We need field detectors of the highest order so we can see how the reactors behave and how space is built. We need finances to build the place.

30940 K: we will be given the protection by the Ghanaian military as the military base is part of Ghana Atomic so everything is protected. When we went on the land, the protectors of the land were in such a hurry to come to see us, thanking us for bringing this into Ghana. We met one of the kings a couple of weeks ago and he said, *come to my place and I will give you the land and you can build it here.* Then it would become part of a kingship. In Africa there are still local kings who are more powerful than the government. There is a lot

of support, but now we have to expand beyond this. We need a lot of things; anything you can imagine, we need.

31024 K: as I said we need those of you are knowledgeable in the correct way to build plasma fields to build equipment for upright gans units for medical application. The first unit has been donated to the KF Ghana thanks to His Excellency, Dr. Rodrigo in the United States. He should be on his way here and you will see the latest models built by him and his wife donated to the KF Ghana. We need to do conferences and show the papers and research. But at the same time we need to do other things to bring everything together. In the coming time it is us who can change the course of the thousands of years of what I call wrongdoing done by our parents, so that we put everything right for all of us. Thank you very much for today.

Rick: Thank you for that additional part Mr Keshe. OK that wraps up the 161<sup>st</sup> Knowledge Seekers Workshop for Thursday, March 2, 2017 and as always thank you everybody for attending.
