

TAX THE FED!

Funny that when the banking friends of the Federal Reserve are in trouble the FED magically pulls \$16 TRILLION USD out of its back pocket to save them! **Who's going to save us?**

The Federal Reserve is a Private Tax Free U.S. Corporation! They have a most favored charter with the United States Government because they are charged with the responsibility to keep U.S. Monetary Policy mainly to oversee the soundness and confidence of our U.S. Banking and Financial System. This begs the question, "If the FED can pull \$16 TRILLION USD out of their back pocket to save their banking friends, then why have they failed so miserably at maintaining the soundness and confidence in the U.S. Dollar?" All Americans have lost value in our homes, our Pension Plans, our personal investments, our jobs, and now even our children's futures! The rate at which most of the wealth is shifted to the elite few is alarming. Congress is lost and thinks its sole purpose is to find more, and more, creative ways to pass new taxes on WE THE PEOPLE until we work for the tax collector. **Old King George must be laughing in his grave!**

Let those who would shackle us pick their own form of penance. Currently, two U.S. lawmakers have just outlined a proposal to tax U.S. financial transactions. **SO BE IT!** WE THE PEOPLE will instead propose a 1% tax on ALL financial transactions of the Federal Reserve and a 5% tax on all Off Ledger Accounts held in USD by any Financial Institution in the U.S. including their affiliates domestic, or foreign, with **NO EXCEPTIONS!** The new found Tax Revenue to the U.S. Treasury will allow us to facilitate what I call the 20-20-20 Tax Proposal! With this new Tax Revenue we can start by increasing Medicare and Social Security benefits by 20%, increasing Military funding by 20%, and **REDUCING** the U.S. Federal income taxes by 20% across the board. **I call this the WE THE PEOPLE'S brand of Equality and Justice!** Taxing the **UNTAXED** Elite to re-engage what our founding Fathers bequeathed unto us, Equal opportunity for Life, Liberty, and the Pursuit of Happiness. We must request that our Congressional Representatives pass these proposed demands into **LAW ASAP!** **The Opportunity to control our own destiny in this matter is to ACT now.**
