Use GANS of

GANS	Effect	Metal 1	Metal 2
CO2	Nervous System= Emotions, Balances Neuro System	Zinc	Nanocoated Copper
CuO2	Lymph System= Physicality, disinfection (don't apply too long e.g. as a patch on skin)	Copper	Nanocoated Copper
CH3	Blood System = Energy Flow, energizing	Iron	Nanocoated Copper
ZnO	Focus on Emotions (as cause of disease)	Zinc	Nanocoated Zinc
CaO	Calcium for the bones (use same procedure to produce GANS of other materials like Food-GANS)	e.g. use bone marrow of chicken bone, add caustic + boiled water, wash it, add CO2	
Amino Acid	Connects to your body	Collect on top of container	

Make GANS

Copper Wire, twist together*

Metal 1   Metal 2

Salt Water Solution 3-10 grams/100ml of distilled water

GANS

Amino Acid Layer on top of water

*If available, use LED (best green) or PC-Fan between the 2 metals, this takes longer, but results are better.

Make GANS-water ~24h later

1.) Collect Amino Acid Layer with Spoon
2.) ~5 times: Remove Salt Water, Add distilled water. 3.) Now you can refill as often you want. For body use only GANS-water.

GANS Water
GANS

Nanocoat Copper by caustic

(1) Caustic Bath (a) place copper wire/plates in container (b) cover bottom slightly with NaOH (c) put cover on container with gap, pour hot water in (d) close gap (e) **Wait 0,5h**

(2) Caustic Steam (a) cover bottom slightly with NaOH (b) hang copper wire/plate in container (c) put cover on with gap, pour hot water in (d) close gap (e) **Wait 48h+**

(3) Curing/Drying (3 days+) (a) empty water (b) every ~6h touch wire/plate with Voltmeter (mV) the same on both ends for some seconds
Cover
Container
NaOH + HOT water
mV
Plasma flow

Nanocoat Copper by fire with torch

(1) take copper wire/plate, (2) use torch (3) heat copper until shines silver/gold (4) move flame slowly (5) let it cool (6) repeat 3 times+

Too hot: Glows
Too cool: Play of Colors Just repeat

Butane Propane

Coating= Plasma flow

Nanocoat Copper by fire (if caustic/ torch NOT available)

(1) take copper wire, (2) make fire with wood, (3) place wire in/near fire (mustn't glow), (4) remove + place 30x
If NO copper available: (1) Burn fruits, herbs, etc. Ash=Nano Material, (2) Mix in water, then its energized

Systems to use GANS-Water: Don't touch GANS, only GANS-water

1 Spray   2 Compress   3 Drink   4 Inhale   5 Bath   6 Stand/Lay between   7 rotate/protect

Patch

Cuts, Skin infections
Clean the cut or infected skin
CO2 + CuO
1 : 1
Use system 1, 2, 6, 7

Internal Injuries
Add drops of GANS-water to water
| 5 | 3 | 1 | 1 |
| CuO | CO2 | ZnO | Amino |
All systems possible

Broken Bones
Add drops of GANS-water to water
| 4 | 2 | 2 | 1 | 1 |
| CuO | CO2 | CaO | CH3 | Amino |
Use system 2, 3, 4, 7

Prevention Nuclear Incident
☢
Drink 3x a day a spoon of CO2
+ Use CO2-Patches on clothes, socks, shoes, spray walls and windows with it

Head, Brain Injuries
Add drops of GANS-water to water
| 4 | 2 | 4 | 1 |
| CO2 | CaO | ZnO | Amino (ZnO) |
Use system 2, 3, 4, 7

Radioactive Contamination
☢
Make a Bath, 3 times a day, add
3l GANS-Water of CO2

Water Purification
💧
Add to contaminated water
1l CuO/100l use 50% of top-water
If NO GANS available: (1) Get water container, (2) add **wood-ashes** (3) let settle down, (4) put top water to other container, (5) repeat 3 times

Electromagnetic Pollution shield
Place "Infinity Loop" on devices: Take stranded nanocoated copper wire & form an "eight"

Make and Use Patch:
(1) Put Co2 GANS-water in a bottle add a few drops of the CuO GANS-Water (also other GANS-waters possible) (2) Put 10–15 ml of prepared water on house-holdpaper (e.g. with syringe), put it e.g. in ZIP-LOCK . Press off remaining air, close (3) label. Apply on painful location. Better use 2 patches of different ganses or 2 patches at one + 1 at other side
Open Wounds/Burns Treatment: Use 3 patches (CO2/CuO2/CO2) after bandage.
Direct Food: Use 3 patches on stomach (CO2/CH3/CO2) or Food-GANS (GANS from fruits, vegetables, etc., produced like CaO, instead of bone marrow, smash food) at the back of body and CO2 GANS-patch over stomach to create flow.

~15 ml CO2 + ~3 drops CuO

CO2
CuO2
CO2
Bandage

Make and Use Pain Pen:
(1) Take a straight copper wire, bend one end **(2)** Take another piece, make a coil with at least 18 windings, counter-clockwise (e.g. take screwdriver, lay wire on it, turn left), bend one end **(3)** Make a second coil like first but with larger diameter **(4)** Put all 3 inside each other and coat with torch or caustic **(5)** Wrap adhesive tape or put in plastic/glass tube. Apply on affected areas for 30-40 seconds daily, up to 5x. Nanocoated single coil or straight wire with bended ends also work! Increase windings by step of 9 (27, 36, ..)
